TABLE OF CONTENTS

PART 1: CORE OPERATIONS & CUSTOMER LIFECYCLE

14 Chapters

The CRM-First Philosophy & Customer Master Record Architecture

1. Master Operations Flow	Ch. 1	2. Mastering the Customer Lifecycle	Ch. 2
3. End-to-End Online Booking Workflow	Ch. 3	4. Prospect vs. Customer Logic	Ch. 4
5. Customer Database & Garage Management	Ch. 5	6. Customer Profiles & History	Ch. 6
7. Prospect & Lead Management	Ch. 7	8. Garage & Vehicle Management	Ch. 8
9. Multi-Vehicle Bookings	Ch. 9	10. Retention Hub & Outreach	Ch. 10
11. Client Experience Preview	Ch. 11	12. Customer Management & Booking Flow	Ch. 12
13. Main Menu	Ch. 13	14. Main Menu / Header Control	Ch. 14

PART 2: APPOINTMENTS, SCHEDULING & FIELD SERVICE

11 Chapters

Service Checklist, Rig Management & Physical Execution

15. Booking & Appointment Manager	Ch. 15	16. Hybrid Availability & Scheduling	Ch. 16
17. Staff Scheduling & Shifts	Ch. 17	18. Professional Service Checklist	Ch. 18
19. Checklist Tools Guide	Ch. 19	20. Checklist Final Steps & Offline Capability	Ch. 20
21. Client Pre-Service Evaluation	Ch. 21	22. Shop Tasks & Reminders	Ch. 22
23. Mobile Setup (F150 Command Center)	Ch. 23	24. Mobile Unit Configuration	Ch. 24
25. Shop Setup & Configuration	Ch. 25		

PART 3: FINANCIALS, PRICING, INVOICING & PAYROLL

21 Chapters

Commercial Operations, Bookkeeping & Profit Maximization

26. Estimates & Quotes	Ch. 26	27. Hosted Estimate Acceptance Portal	Ch. 27
28. Invoicing & Payments	Ch. 28	29. Hosted Invoice Payment Portal	Ch. 29
30. Quick Pay (In-Person Payments)	Ch. 30	31. Business Accounting	Ch. 31
32. Financial Summary & Valuation	Ch. 32	33. Net Profit & Valuation Breakdown	Ch. 33
34. Employee Payroll	Ch. 34	35. Compensation Calculator	Ch. 35
36. Time & Profitability Dashboard	Ch. 36	37. Company Budget	Ch. 37
38. Break-Even Analysis	Ch. 38	39. Tax Preparation	Ch. 39
40. Tax & Sales Tax Summary	Ch. 40	41. Service & Package Pricing	Ch. 41
42. Package Comparison Tool	Ch. 42	43. Vehicle Type Classification	Ch. 43
44. Add-on & Upsell Scripts	Ch. 44	45. Phone Assistant Utility	Ch. 45
46. Mileage Tracker	Ch. 46		

PART 4: CHEMICALS, DILUTION & INVENTORY CONTROL

23 Chapters

Chemical Science, Safety, Ratios & Supply Chain

47. Master Inventory Control	Ch. 47	48. Inventory Control	Ch. 48
49. Chemical Description & Tips	Ch. 49	50. Chemical Documentation v3	Ch. 50
51. Master Ratio: Source of Truth	Ch. 51	52. Dilution Reference Chart	Ch. 52
53. Prime Dilution Calculator	Ch. 53	54. Prime Dilution Masterclass	Ch. 54
55. Interactive Dilution Manager	Ch. 55	56. Chemical Ratio Modal	Ch. 56
57. Chemical Decision System	Ch. 57	58. AI Chemical Assistant	Ch. 58
59. Chemical Knowledge Cards	Ch. 59	60. Chemical Cards (Knowledge Base)	Ch. 60
61. Checklist Chemical Management	Ch. 61	62. Chemical Inventory Modal	Ch. 62
63. Caddy Worksheet	Ch. 63	64. Chemical Label Maker	Ch. 64
65. Chemical Workflow	Ch. 65	66. Inventory Audit Checklist (IAC)	Ch. 66
67. Materials & Equipment Usage Log	Ch. 67	68. Materials & Equipment Usage Report Log	Ch. 68
69. Vendor & Supplier Management	Ch. 69		

PART 5: STAFF, TRAINING, CERTIFICATION & COMMUNICATIONS

12 Chapters

Workforce Development, Examinations & Internal Channels

70. Employee Training & Access Hub	Ch. 70	71. Technician Certification Program	Ch. 71
72. Detailing Learning Library	Ch. 72	73. New Employee Orientation	Ch. 73
74. Staff Profiles & Compensation	Ch. 74	75. Company Employees	Ch. 75
76. Secure Team Communication	Ch. 76	77. Cheat Sheet & Exam Control	Ch. 77
78. Training & Exams	Ch. 78	79. Guided Training & Demo Mode	Ch. 79
80. Understanding Links vs. Cards	Ch. 80	81. Rick's Tips & Admin Controls	Ch. 81

PART 6: BUSINESS INTELLIGENCE, ANALYTICS & REPORTS

15 Chapters

Data Architecture, Performance Tracking & Executive Summaries

82. Business Analytics & Insights	Ch. 82	83. Admin Dashboard	Ch. 83
84. Booking Calendar Analytics	Ch. 84	85. Reports & Analytics Hub	Ch. 85
86. Reports Center Masterclass	Ch. 86	87. Temporal Scan (Date Filtering)	Ch. 87
88. Intelligent Logic Grouping	Ch. 88	89. Customer Data Reports	Ch. 89
90. Invoice & Payment Audits	Ch. 90	91. Inventory Value Reports	Ch. 91
92. Technician Performance Analytics	Ch. 92	93. Estimates & Quote Performance	Ch. 93
94. Full Business Accounting Report	Ch. 94	95. Smart Mission Logic Inspector	Ch. 95
96. Jobs Completed	Ch. 96		

PART 7: WEBSITE CONTENT, MARKETING & PUBLIC PORTALS

20 Chapters

Client Touchpoints, Digital Marketing & Online Experience

97. Website Administration	Ch. 97	98. Website	Ch. 98
99. Website Content Management	Ch. 99	100. Home Page Content Control	Ch. 100
101. About Page Content Control	Ch. 101	102. FAQs Management	Ch. 102
103. Contact Control	Ch. 103	104. Contact Form: Photo Attachments	Ch. 104
105. Footer Content Control	Ch. 105	106. Testimonials Management	Ch. 106
107. Detailers Blog Management	Ch. 107	108. Elite Story Master (Reordering)	Ch. 108
109. Promo Codes & Marketing	Ch. 109	110. Discount Coupons	Ch. 110
111. Business Card & QR Generator	Ch. 111	112. Vehicle Type Management	Ch. 112
113. Service Disclaimers & Descriptions	Ch. 113	114. Business Launch Manager	Ch. 114
115. Winter & Seasonal Closures	Ch. 115	116. Booking Test Mode	Ch. 116

PART 8: SYSTEM ADMINISTRATION, SECURITY & MASTER SETTINGS

21 Chapters

Security Policies, Role Access & Platform Utility

117. Application Master Settings	Ch. 117	118. Settings	Ch. 118
119. Settings (Quick Access)	Ch. 119	120. Users & Permissions	Ch. 120
121. Users & Roles	Ch. 121	122. User Management - Quick Tips	Ch. 122
123. User Management	Ch. 123	124. My Profile & Notification Settings	Ch. 124
125. Smart Sync: Fix Duplicates	Ch. 125	126. Deleting Records & Test Data Cleanup	Ch. 126
127. Test Customer & Sandbox Workflow	Ch. 127	128. Photo & Media Management System	Ch. 128
129. Media Library & General Gallery	Ch. 129	130. Business Drive & File Manager	Ch. 130
131. Sticky Notes	Ch. 131	132. Personal Notes & Secure Journal	Ch. 132
133. Prime Letter Maker	Ch. 133	134. Alerts & Notifications	Ch. 134
135. Real-time Alerts	Ch. 135	136. Add Customer (Quick Action)	Ch. 136
137. Menu Visibility Controls	Ch. 137		

PART 1 OF 8

CORE OPERATIONS & CUSTOMER LIFECYCLE

The CRM-First Philosophy & Customer Master Record Architecture

Fundamental operating doctrines, customer relationship management, vehicle garage administration, prospect conversion pathways, and the end-to-end booking lifecycle.

Contains 14 structured operational chapters.

CHAPTER 1 • SYSTEM

MASTER OPERATIONS FLOW

CHAPTER SCOPE & OBJECTIVE:

The complete start-to-finish workflow for professional detailing operations and customer lifecycles.

MASTER OPERATIONS WORKFLOW MATRIX

Summary of the six operational phases governing the Prime Auto Detail lifecycle.

PHASE	TRIGGER / EVENT	PRIMARY TOOL / VIEW	CORE ACTION	RESULTING RECORD
1. Lead Capture	Inquiry from phone/form	Prospects Page	Create contact record	Prospect Profile
2. The Commitment	Client confirms booking	Bookings Calendar	Assign vehicle & package	Confirmed Appointment
3. Rig Preparation	Day of service setup	Prep Summary Tool	Gather chemical caddy & gear	Ready Rig Checklist
4. Job Execution	Service start	Service Checklist	Digital inspection & timer	Completed Steps Audit
5. Billing & Close	Service completed	Invoicing / Quick Pay	Collect card/cash/check	Paid Taxable Invoice
6. Retention Cycle	4-8 weeks post-service	Follow-Up Center	Send maintenance reminder	Repeat Client Booking

The Prime Methodology: This system is built on a **CRM-First Architecture**. To ensure your shop runs like a professional machine, every action should follow the "Customer Master Record" logic.

 PHASE 1: LEAD CAPTURE (THE PROSPECT)

- **When:** Anytime a potential client inquiries but hasn't booked.
- **Action:** Create a record in the **Prospects** page.
- **Why:** Keeps your active client list clean and lets you track follow-up conversion rates.

 PHASE 2: THE COMMITMENT (THE BOOKING)

- **Order of Operations:** Search CRM → Select/Add Customer → Assign Vehicle from Garage → Select Package.
- **Automation:** Once saved, the system auto-calculates pricing based on **Vehicle Class + Package**. Never manually guess a price again.

 PHASE 3: PREPARATION (RIG SETUP)

- **When:** Day of service.
- **Tool:** Open the **Prep Summary** PDF in the checklist. It lists every specific chemical and tool needed for that specific job so you gather everything at once.

 PHASE 4: EXECUTION (THE SERVICE)

- **Action:** Start the **Job Timer** in the Service Checklist.
- **Logic:** Every checked step creates a permanent audit trail. Use the **Digital Inspection** tool to document pre-existing damage before touching the car.

 PHASE 5: COMPLETION & BILLING

- **Automation:** Clicking "Finish & Complete Job" stops the timer and generates a **Pending Invoice** automatically.
- **Payment:** Collect payment via the mobile-ready interface. Mark as **Paid** to move the revenue into your Ledger.

 PHASE 6: THE CYCLE (RETENTION)

- **When:** 4-8 weeks later.

- **Tool:** The **Follow-Up Center** alerts you that the client is "Due for Service" based on their maintenance cycle.
- **The Goal:** Turn a one-time booking into a lifetime maintenance client.

THE "DIRECT BOOKING" FLOW (PHONE/EMAIL)

When a customer calls or emails and wants to book immediately (skipping the "Prospect" lead phase):

1. **Open Bookings:** Go directly to the **Bookings** page.
2. **Customer Link:** Click the "+" to add a new booking. In the **Customer** field, start typing their name.
3. **Instant Creation:** If they are new, click "Add New Customer" from the dropdown. Fill in their Phone and Email immediately—this creates their permanent CRM record.
4. **Add Vehicle:** Enter the Year, Make, and Model. **CRITICAL:** Set the **Vehicle Type** (e.g., Mid-Size/SUV) to trigger the correct pricing.
5. **Package selection:** Choose the service. The system will auto-populate the price based on your master settings.
6. **Save & Sync:** Once you click **Save**, the customer is in your CRM, the vehicle is in their Garage, and the appointment is on your calendar.

SYSTEM LOGIC & BEST PRACTICES

- **Master Records:** The **Customer** is the owner. **Bookings** are events. NEVER delete a Customer with history; always **Archive** instead.
- **Duplicates:** Search before you save! Duplicates are the #1 cause of lost service history.
- **Invoices:** Never delete a financial record. If an error occurs, "Cancel" or "Void" it to maintain a clean tax trail.

 **Pro Tip:** The smartest workflow is to ALWAYS start with a search in the **Bookings** or **Customers** page. If they aren't found, that is your trigger to create a new profile.

CHAPTER 2 • SYSTEM

MASTERING THE CUSTOMER LIFECYCLE

CHAPTER SCOPE & OBJECTIVE:

A comprehensive guide from lead capture to final payment and retention.

The Gold Standard Workflow: Follow this path to ensure 100% data accuracy and maximum professionalism in your shop.

 PHASE 1: THE PUBLIC PORTAL (AUTOMATED)

When a new client visits your website and books online:

1. **Smart Identity Check:** Before creating anything, the system checks if they already exist (by email → name → phone). If found, the booking is linked to their existing record — no duplicate is created.
2. **New Visitor:** If they are brand new, a **Prospect** record is created and the booking appears in **Booking History** with a Tentative (Yellow) status.
3. **Your Review:** Open the **Booking History** page to see the new submission. You can then verify the details, change their status, or use the **"Add to Prospects"** button if they need to be formally added to your lead pipeline.
4. **Note:** New online bookers do NOT automatically appear in the Prospects page — they land in Booking History first for your review. You decide what to do next.

 PHASE 2: MANUAL ENTRY (PHONE/IN-PERSON)

If a customer calls you to book directly:

1. **Search First:** Go to the **Bookings** page and click "+". Type their name in the Search box.
2. **The "Prospect" Fork:** If they exist as a Prospect, select them. This links the new job to their lead history.
3. **The "New Client" Fork:** If they aren't found, click **"Add New Customer"**. Fill in Name, Phone, and Email immediately. This creates their CRM record on the fly.
4. **Garage Setup:** Add the vehicle details (Year/Make/Model/Size). Setting the **Size** (e.g., Large Truck) is crucial as it auto-calculates the price based on your settings.
5. **Save:** Once saved, they are officially in your CRM and on your schedule.

 PHASE 3: CONVERSION & CONFIRMATION

1. **Status Flip:** Once you speak to the client and confirm, edit the booking status to **"Confirmed"** (Green).
2. **Promotion:** If they were a Prospect, you can manually change their type to Customer in their profile once the first job is confirmed or started.

 PHASE 4: EXECUTION (THE SERVICE)

1. **Checklist:** On job day, click **"Start Service"**. This begins the professional audit trail and the **Job Timer**.
2. **Digital Inspection:** Use the checklist to document "Before" condition. These photos are permanently stored in the customer's profile gallery.

 PHASE 5: COMPLETION & BILLING

1. **Finish Job:** Clicking "Finish & Complete" stops the timer and **automatically generates the Invoice**.
2. **Payment:** Process payment via the interface. Marking it "Paid" moves the funds into your Accounting ledger.

 **Pro Tip:** Use the **HelpCircle icons** found in the Garage and Booking sections for instant context on specific tools!

CHAPTER 3 • SYSTEM

END-TO-END ONLINE BOOKING WORKFLOW

CHAPTER SCOPE & OBJECTIVE:

The complete process from start to finish of when a customer puts in an online booking all the way through to final retention.

The Complete Online Booking Workflow (Start to Finish)

This guide outlines your exact responsibilities and the system's automated actions from the moment a customer submits an online booking until their final payment and retention follow-up.

 PHASE 1: The Request (Public Submission)

- **Action:** The customer submits the "Book Now" form on your public website.
- **System Automation:** The system automatically checks the database to prevent duplicates (matching Email → Name → Phone). If the customer is brand new, it silently creates a **Prospect** profile for them. The booking is added to your calendar with a **Tentative (Yellow)** status. An instant in-app notification rings your Admin Bell, and an alert email is sent to your inbox.
- **Your Responsibility:** Check your notification bell. Open the new booking in your Bookings page or the Prospect's profile to review the requested package, vehicle size, and any reported vehicle conditions.

 PHASE 2: Assessment & Estimates (Optional but Recommended)

- **Action:** You review the job requirements.
- **Your Responsibility:**
 - **Standard Job:** If the requested service and price look perfectly standard, you can skip straight to Phase 3.
 - **Custom Job:** If the vehicle requires heavy detailing (e.g., they selected "Poor" condition) or you need to formalize a custom quote, navigate to the **Estimates** page. Generate an official Estimate using the details from their booking and email it to them via the Engagement Hub. This action is permanently logged in their timeline.

 PHASE 3: Approval & Confirmation

- **Action:** The job is formally accepted.
- **Your Responsibility:** Open the **Edit Booking** modal. Change the booking status from *Tentative* to **Confirmed (Green)**. Click the **Approve & Email** button. This sends the customer a professional confirmation email locking in their date, time, and service expectations.
- **Pro Tip:** If they were a Prospect, this is the perfect time to open their profile and toggle their status to **Customer**.

 PHASE 4: Execution (Day of Service)

- **Action:** Performing the physical detail.
- **Your Responsibility:** Open the **Service Checklist** for the active job. Review the **Prep Summary** to gather your exact chemicals and tools before touching the car. Click **Start Service** to start the official Job Timer. Perform the Digital Inspection (taking before photos to protect yourself against liability). Check off the service steps as you complete them.
- **Crucial Step:** When the car is fully detailed, click **Finish & Complete Job**. This stops the timer, logs your labor analytics, and removes the job from your active queue.

 PHASE 5: Invoicing & Payment

- **Action:** Collecting your revenue.
- **System Automation:** Hitting "Finish & Complete Job" in the previous step *automatically* generates a Pending Invoice for the customer.

- **Your Responsibility:** Open the **Invoicing** page. Review the automatically generated invoice. Add any last-minute upcharges or discounts if needed. Send the final invoice to the customer via email. Once the customer hands you cash or the digital payment clears, mark the invoice as **Paid** in the CRM.
- **Result:** Marking it Paid officially injects the revenue into your Accounting ledger and Net Profit analytics.

PHASE 6: Retention & Follow-Up

- **Action:** Turning a one-time customer into a lifetime client.
- **System Automation:** The completed job is permanently bound to the customer's vehicle history.
- **Your Responsibility:** In 4-8 weeks, the system will flag the client in the **Follow-Up Center** as "Due for Service". Use the built-in outreach tools to send a pre-drafted 1-click email campaign to schedule their next maintenance wash, completing the business cycle!

MANUAL ENTRY (Phone / Walk-in)

1. **Always start in Customer Profiles — search first.** Even if you are certain who it is. This eliminates all duplicate problems.
2. **Open their card — tap the green "Book Job" button.** Never navigate to the Bookings page directly for a known customer.
3. **Fill in all job details — save the booking.** Add a booking note if anything unusual applies. Check the Booking Lifecycle panel to confirm the link is solid.
4. **Back to their card — Log Activity.** "Walk-in", "Repeat customer texted me". One line is enough.

CHAPTER 4 • SYSTEM

PROSPECT VS. CUSTOMER LOGIC

CHAPTER SCOPE & OBJECTIVE:

Understand how the system distinguishes between potential leads and active clients, and how online bookings are handled.

The Relationship Cycle: Your database categorizes individuals into two primary groups to help you focus your marketing and operations correctly.

1. What is a Prospect?

A **Prospect** is someone who has inquired about services or requested an estimate but has NOT yet had a confirmed booking or completed service.

- **Focus:** Lead nurturing, sending follow-up estimates, and introductory discounts.
- **Location:** These clients appear in the **Prospects** page.

2. What is a Customer?

A **Customer** is anyone who has an active or past confirmed booking/checklist in your system.

- **Focus:** Retention, maintenance reminders, and loyalty rewards.
- **Location:** These clients appear in the **Customers & History** pages.

3. Online Booking Flow (The Smart Dedup)

When someone books through your public website, the system uses a 3-step identity check **before** creating any new record:

- **Step 1 — Email Match:** If their email already exists in the database (Customer or Prospect), the booking is linked to that existing record. No duplicate is created.
- **Step 2 — Name Match:** If the email is new but the name matches an existing record (e.g., they used a different email), the booking links to that existing record.
- **Step 3 — Phone Match:** If name also doesn't match, the system checks their phone number.
- **Step 4 — New Prospect:** Only if ALL three checks find nothing does the system create a brand-new Prospect record.

4. Where do online bookings appear?

After an online booking is submitted, the booking appears immediately in your **Booking History** page under the booker's name.

- If they were already a Customer — it is linked to their existing Customer record. 
- If they were already a Prospect — it is linked to their existing Prospect record. 
- If they are completely new — a new **Prospect** record is created, and the booking appears in Booking History. You can then manually promote them to Customer from the "Add to Prospects" or edit their type.

5. Manual Overrides

Mistakes happen! If someone is incorrectly marked:

- **Edit Profile:** Go to the Customer Database or Prospects page, find the person, and click the Edit icon.
- **The Toggle:** Use the "**Relationship Type**" switch in their profile to manually flip them between Prospect and Customer.

 **Pro Tip:** Always search before you save! The **Booking History** page is a great place to review new online submissions and decide whether to keep them as a Prospect (still evaluating) or promote them to Customer (ready to service).

CHAPTER 5 • MENU

CUSTOMER DATABASE & GARAGE MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Master the complete workflow for managing your client relationships and their vehicles.

The Proper Workflow: To keep your records clean and avoid booking confusion, follow this professional order:

1. Search Before Adding

Always start by searching for the customer by name, phone, or email. This prevents duplicate profiles and keeps your history unified.

2. Profile & Contact Management

When adding or editing a profile, ensure the **Phone Number** and **Email** are accurate. These are the engines that power your automated reminders and receipts.

3. Managing the "Garage" (Multiple Vehicles)

A customer can own many vehicles. Use the **"Manage Vehicles"** section within the customer profile to add every car they own. This creates a permanent "Garage" for that client.

- **Benefit:** When booking future appointments, you can simply select the vehicle from their garage instead of typing it again.

4. Booking from the Profile

The safest way to book a job is to open the customer profile first, then click the **"Book Job"** button next to the specific vehicle. This ensures the appointment is correctly linked to both the person and the car.

5. Archiving Inactive Records

If a customer moves away or no longer uses your services, use the **Archive** button. This removes them from your active search results but preserves their full service history for your financial records.

- **Restoring:** Toggle "Show Archived" at the top of the page to find and restore any archived customer.

 **Pro Tip:** Use the **Notes** section to record specific preferences like "No scented spray on interior" or "Customer prefers morning appointments only."

CHAPTER 6 • MENU

CUSTOMER PROFILES & HISTORY

CHAPTER SCOPE & OBJECTIVE:

Master database of every client and vehicle you have serviced.

Overview: Build a robust "Customer Relationship" for long-term retention.

- **History:** View every past invoice, note, and photo for a specific vehicle.
- **Notes:** Record specific preferences (e.g., "Do not use scent on interior").

CHAPTER 7 • MENU

PROSPECT & LEAD MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Track potential customers who haven't booked their first job.

Overview: The "Sales Pipeline" for your detailing business.

- **Status Tracking:** New Inquiry, Quote Sent, or Follow-up Needed.
- **Nurturing:** Send "First-Time Customer" discounts to close the deal.

CHAPTER 8 • SYSTEM

GARAGE & VEHICLE MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Learn how to manage customer vehicles, edit details, and handle duplicates.

The Customer Garage: Every client profile includes a "Garage" that stores their specific vehicles. This ensures consistent service history and automated pricing based on vehicle class.

 1. Editing Vehicle Details (Direct Control)

You can now modify any vehicle in a customer's garage with high precision.

- **The Pencil Icon:** Click the blue Pencil icon next to any vehicle in the Garage list (found in both Prospects and Customer profiles). This triggers the profile editor.
- **Modification:** You can update the Year, Make, Model, Type (Compact/SUV/etc.), or Color. For example, if you forgot the year for a "Ram 1500," click Edit, enter the year, and Save.
- **Immediate Sync:** These changes are reflected instantly in the CRM and any future service checklists or invoices.

 2. Deleting & Garage Maintenance

- **Trash Icon:** Use the red Trash icon to remove a vehicle from a customer's garage permanently. This is the professional way to handle old vehicles they no longer own or "mistake" entries.
- **Audit Trail Safety:** Deleting a vehicle from the garage removes it as a selection for new bookings but does NOT erase past service history tied to that vehicle—ensuring your financial records stay intact.

 3. Handling Duplicates (Auto-Merge)

The system includes an **Automated Deduplication Engine**. When you save a customer, it scans their garage and automatically merges entries that have the same Make, Model, and Year.

- **Pro Tip:** To manually merge two slightly different entries (e.g., "Ford F150" and "2024 F150"), use the Pencil icon to make their details match exactly. On save, the engine will combine them into one master record.

 **Pro Tip:** Always ensure the **Vehicle Type** (Compact, SUV, Truck) is accurate. This is the logic "Master Switch" that determines your automated pricing for every service package.

CHAPTER 9 • SYSTEM

MULTI-VEHICLE BOOKINGS

CHAPTER SCOPE & OBJECTIVE:

How to add multiple cars to a single appointment and manage vehicle details.

Booking Multiple Vehicles: You can now append additional cars to a single appointment request. This is ideal for families or businesses booking several vehicles at once.

**1. Adding Another Vehicle**

Click the "+ **Add Another Vehicle to This Appointment**" button located below the first vehicle's details. This will create a new section for the second car.

**2. Vehicle Details**

For each additional vehicle, you must specify the **Year, Make, Model, and Size**. You can also include the **Color and License Plate** to help the detailer identify the vehicle upon arrival.

**3. Package & Add-on Selection**

Each vehicle can have its own specific **Service Package** and **Add-ons**. The total price at the bottom of the form will automatically update to reflect the combined cost of all vehicles.

**4. Administration & History**

All vehicles will be submitted as a single booking request. In the **Admin Dashboard**, the additional vehicle details will be saved in the **Notes** section of the booking.

- **Pro Tip:** In the **Prospects** or **Customers** view, you can manage a client's "Garage" by adding multiple permanent vehicles to their profile. This allows you to quickly select them for future appointments.

CHAPTER 10 • MENU

RETENTION HUB & OUTREACH

CHAPTER SCOPE & OBJECTIVE:

Master customer retention with a unified communications timeline, automated reminders, and simplified outreach tools.

Overview: The Retention Hub is your central tool for staying connected with customers and prospects. It automatically identifies who needs attention and gives you the tools to act immediately from one place.

 Quick Stats Bar (top of page)

Shows at a glance: total overdue customers, customers due soon, active prospects, and emails sent this month. Updates in real time as you take actions.

 Threshold Setting

The number of days since a customer's last service before they appear as overdue. Default is 90 days. Edit the number inline and toggle between Days and Months. Toggle "Active" on or off to pause follow-up tracking entirely.

 Three Sections (collapsible)

- **Overdue:** Real paying customers who haven't had service in longer than your threshold. These are your highest priority. Each card shows their last service, how many days ago it was, and their contact info.
 - *Send Follow-up*: opens your outreach email templates for this customer.
 - *Apply Coupon & Send*: sends a follow-up email with a discount code attached.
 - *Send Estimate*: opens the estimate builder pre-loaded with this customer.
 - *Write Letter*: opens the AI Letter Maker pre-loaded with this customer's info.
 - *Schedule Booking*: opens the new booking modal pre-loaded with this customer.
 - *Mark as Contacted*: log that you contacted them outside the app (called, texted, etc.). Add a brief note, resets their inactivity clock.
 - *Snooze*: temporarily removes them from the list for 7, 14, or 30 days. They reappear automatically when the snooze expires.
 - *View Profile*: opens their full customer profile.
- **Due Soon:** Customers approaching your threshold. Proactive outreach now prevents them from becoming overdue.
 - *Send Maintenance Reminder*: sends a "time for your next detail" email.
 - *Write Letter / Schedule Booking / Mark as Contacted / Snooze / View Profile*: Same actions as Overdue.
- **Prospects:** Leads who haven't booked yet. Lower priority than paying customers but worth nurturing.
 - *Send Welcome Email*: sends a prospect introduction/nurturing email.
 - *Convert to Customer*: changes their status to customer in the database (same as using the Convert button in their profile edit modal). They move out of Prospects automatically. Confirm before using.
 - *Mark as Lost*: removes them from active prospects without deleting their record. Use the "Show Lost" toggle in the header to see and restore lost prospects.
 - *Write Letter / Schedule Booking / Snooze / View Profile*: Same actions as Overdue.

 Search and Sort

Use the search bar at the top to instantly filter across all three sections by customer name. Use the sort dropdown on each section to sort by: Most Overdue First (default for Overdue), Alphabetical, or Highest Value (sorts by their last booking total so you can prioritize your best customers).

AI Letter Maker (10 templates)

Accessible from any customer card via "Write Letter." Templates available:

- New Lead Welcome & Intro
- Spring/Seasonal Paint Prep Promotion
- Ceramic Coating Annual Maintenance
- Maintenance Wash Membership Club
- Post-Detail Thank You & Review Request
- Lost Client Re-Engagement
- Paint Correction Consultation Follow-Up
- Gift Card & Holiday Detailing Promo
- Commercial & Fleet Detailing Proposal
- Pre-Winter Paint Protection Plan

Select a template, edit the pre-filled content with the customer's specific details, click "AI Professional Refine" to have AI polish the writing, then copy to clipboard to paste into your Gmail or download as a PDF.

BCC Toggle

When sending emails from the hub, use the BCC toggle to blind-copy your own email address (Rick.PrimeAutoDetail@gmail.com) so you have a backup copy in your Gmail of every outreach sent.

 **Pro Tip:** Check the Retention Hub at the start of each week. Sort Overdue by "Highest Value" to prioritize your best customers first, send your follow-ups, then snooze anyone you know is coming back soon.

CHAPTER 11 • MENU

CLIENT EXPERIENCE PREVIEW

CHAPTER SCOPE & OBJECTIVE:

See exactly what your customers see in their portal.

Overview: Use this to verify the quality of your customer-facing communication.

- **Interactive Preview:** Test the booking flow and media gallery views.
- **Communication:** Preview how invoices and estimates appear to the client.

CHAPTER 12

CUSTOMER MANAGEMENT & BOOKING FLOW

CHAPTER SCOPE & OBJECTIVE:

A step-by-step guide on how prospects, customers, and bookings interact.

1. The Prospect Phase

Prospects are potential customers you have manually added or who have made inquiries but haven't booked a job yet. Use the **Prospects** page to manage these leads.

2. The Booking Phase

When a job is scheduled (manually by you or via the public website), it creates a **Booking Record**. This record is linked to the person's profile in the database.

3. The Customer Phase

Once a prospect has a booking history, the system automatically treats them as an established **Customer**. You can find and edit their full profile on the **Search Customer** page.

4. Booking History vs. Database

- **Booking History:** A timeline of all jobs/activity grouped by person.
- **Database (Search Customer/Prospects):** The master record where you edit phone numbers, addresses, and vehicle details.

5. Archiving Strategy

Archiving a profile hides them from active search results and lists (to keep things clean) but **preserves all their job history** for your records. You can unarchive a person at any time to re-book them.

CHAPTER 13

MAIN MENU

CHAPTER SCOPE & OBJECTIVE:

Complete admin guide with all features and routes.

Use the table of contents to navigate quickly.

Previous/Next buttons let you read through in order.

CHAPTER 14 • MENU

MAIN MENU / HEADER CONTROL

CHAPTER SCOPE & OBJECTIVE:

Control the navigation links and primary menu structure of your website.

Site Navigation: Master how users move through your digital storefront.

 Navigation Links

Add, remove, or rename the links in your top navigation bar. You can custom-tailor the labels to match your marketing strategy.

 Route Mapping

Map each label (e.g., "Book Now") to a specific page URL (e.g., "/book"). This gives you full control over the user journey.

 Reset to Defaults

If your menu structure becomes cluttered, use the "Reset" button to instantly restore the standard site navigation pattern.

PART 2 OF 8

APPOINTMENTS, SCHEDULING & FIELD SERVICE

Service Checklist, Rig Management & Physical Execution

Calendar management, hybrid staff availability, digital multi-point inspection workflows, mobile detailing unit configurations, and offline field checklist execution.

Contains 11 structured operational chapters.

CHAPTER 15 • MENU

BOOKING & APPOINTMENT MANAGER

CHAPTER SCOPE & OBJECTIVE:

Master the complete workflow for professional customer booking and calendar management.

The Detailing Pipeline: Your Booking Manager is the central command for all service appointments. Follow this exact procedure to ensure perfect data integrity and customer satisfaction.

**1. Starting a New Booking**

- **The New Button:** Click the "+" button in the header or directly on any calendar day to open the booking engine.
- **Calendar Views:** Use the Day, Week, or Month toggles to check availability before committing to a time slot.

**2. Customer Identification**

- **CRM Search:** Start typing the customer name. The system will search your live database. If found, it will auto-populate their phone, email, and "Garage" (saved vehicles).
- **New Customer:** If they aren't in your system, fill out the details manually. They will be automatically added to your CRM upon booking.

**3. Vehicle & Service Details**

- **Vehicle Info:** Select from their "Garage" or enter a new Year, Make, and Model. You **MUST** select a **Vehicle Size** (Compact, SUV, etc.) to ensure accurate pricing.
- **Package Selection:** Choose the primary service package. The price will instantly calculate based on the vehicle size.
- **Add-ons:** Toggle additional services like Pet Hair Removal or Engine Bay Detailing. These are added to the running total automatically.

**4. Resource Assignment**

- **Technician:** Assign the job to a specific employee to populate their personal dashboard.
- **Time Blocks:** Set the Start and estimated End time. The system will alert you of any scheduling conflicts with other active jobs.

**5. Finalizing & Confirmation**

- **Save:** Click "Create Booking" to lock in the appointment. The customer record and calendar event are now permanently linked.
- **Status Management:** Use the "Status" badge (Tentative, Confirmed, In Progress) to track the job lifecycle. Moving a job to "Done" automatically prepares it for the Invoicing system.

Badge Logic: The blue number next to "Bookings" in the sidebar represents your **Active Workload** (Tentative, Pending, Confirmed, and In Progress). Once a job is marked "Done" or "Blocked," it is removed from this count.

CHAPTER 16 • MENU

HYBRID AVAILABILITY & SCHEDULING

CHAPTER SCOPE & OBJECTIVE:

Master the logic behind your shop's availability, manual blocks, and automatic calendar sync.

The Hybrid Logic: Your booking engine uses a multi-layer system to determine when customers can schedule services. This ensures you never get double-booked and have total control over your working hours.

1. Manual Scheduling Blocks

The primary calendar allows you to "paint" unavailability directly onto the schedule.

- **How it works:** Click and drag across any time slot to create a manual block. This instantly removes that time from your public website.
- **Usage:** Use this for doctor appointments, personal errands, or shop maintenance that doesn't follow a recurring pattern.

2. Recurring Shop Closures

Set standard rules for when your shop is open or closed.

- **Holidays:** Pre-set standard holidays (Christmas, New Year's) to automatically block the entire day.
- **Weekly Routine:** If you are always closed on Sundays, set a recurring closure here to keep your weekends protected without manual effort.

3. Google Calendar Real-Time Sync

The "Hybrid" part of the system comes from its ability to talk to your personal Google Calendar.

- **Bidirectional Protection:** When you link your Google account, any event you add to your phone's calendar (e.g., "Lunch with Mom") will automatically block that time on your detailing website.
- **Status Lights:** The "Sync" indicator in the header shows if the connection is live. If you see a green light, your personal schedule is actively protecting your business hours.

4. Global Booking Rules

Fine-tune how the system handles new requests.

- **Lead Time:** Prevent "surprise" bookings by setting a minimum lead time (e.g., "No bookings allowed with less than 24 hours notice").
- **Slot Density:** Control how many vehicles can be booked in a single time block. If you have two technicians, you can allow two simultaneous bookings.

Pro Tip: If a customer calls and you want to "squeeze them in" during a blocked time, you can still book them manually from the **Bookings** page—the system only restricts the **Public Website**.

CHAPTER 17 • MENU

STAFF SCHEDULING & SHIFTS

CHAPTER SCOPE & OBJECTIVE:

Manage technician availability and assign work shifts.

Overview: Coordination for your shop floor or mobile detailing team.

- **Shift Calendar:** Assign specific techs to morning or afternoon blocks.
- **Self-Service:** Allow employees to see their assigned jobs in real-time.

CHAPTER 18 • MENU

PROFESSIONAL SERVICE CHECKLIST

CHAPTER SCOPE & OBJECTIVE:

The "Prime Standard" SOP for executing a flawless step-by-step detailing job, with pre-vehicle inspection.

The Prime Methodology: This checklist ensures 100% consistency across every vehicle. Every technician must follow these exact steps from the moment the vehicle arrives until it is delivered.

1. Pre-Vehicle Inspection Checklist (NEW)

- **What it is:** A structured walkaround form completed BEFORE any service begins. It logs the vehicle's condition at intake to protect the shop from liability.
- **Exterior:** 11 checkable points — Paint/Clear Coat, Front/Rear Bumpers, Headlights, Windshield, Door Panels/Mirrors, Wheels, Tires, Wheel Wells, Taillights, Trunk/Tailgate.
- **Interior:** 7 checkable points — Front/Rear Seats, Carpet/Mats, Dashboard/Console, Odor Check, Trunk/Cargo Area.
- **Cost-Impact Flags:** 6 red-flagged checkboxes — Excessive Pet Hair, Heavy Mud/Dirt, Smoke Odor, Stains Requiring Extraction, Biohazard, Excessive Trash. Checking any triggers a surcharge alert.
- **Ask The Customer:** 4 non-checkable reference questions to guide the intake conversation.
- **Sign-off:** Customer name, Detailer name, and Date fields for digital intake sign-off.

2. Job Initialization & Timer

- **Customer Link:** Select the customer and vehicle. This pulls in their specific package and add-ons.
- **Master Clock:** The job timer starts automatically when you check your first item.
- **Prep Summary:** Click the "Prep" icon to see every chemical and tool needed for the selected services.

3. Administrative Time Editing

- **Correcting Logs:** Admins can click the **Yellow Duration Badge** on any step to manually enter correct time in `mm:ss` format.

4. Execution & Chemical SOPs

- **Step-by-Step Flow:** Follow categories in order: Preparation → Exterior → Interior → Final Inspection.
- **Instruction Guides:** Click the "Info" icon on any step to see the exact Prime Standard procedure.
- **Material Tracking:** Log chemical "fractions" used during the job to keep master inventory accurate.

5. Master SOP Architect (Admin Mode)

- **Permanent Standards:** Admins can add, remove, or rename steps globally via the gear icon.
- **Global Update:** Saving changes updates the template for that specific package for all future jobs.

6. Finishing & Post-Payment Popup (NEW)

- **Finish & Complete:** Clicking "FINISH & COMPLETE JOB" stops the timer and shows a "Job & Payment Complete!" confirmation popup.
- **Invoice Button:** The popup includes a direct "View Invoice" button to jump straight to the invoice.
- **Mobile-Ready Payment:** Use "Collect Payment" for a fully responsive checkout optimized for smartphones and tablets.

CHAPTER 19 • CHEMICALS

CHECKLIST TOOLS GUIDE

CHAPTER SCOPE & OBJECTIVE:

Explanation of the quick-action tool buttons at the top of your checklist.

Checklist Tools: These four buttons provide expert resources and preparation guides tailored to the specific job you are performing.

 **Pro Tip:** Always open the **Prep** summary first. It ensures you have 100% of your materials ready at your cart, saving you trips back to the chemical room.

CHAPTER 20 • SYSTEM

CHECKLIST FINAL STEPS & OFFLINE CAPABILITY

CHAPTER SCOPE & OBJECTIVE:

Understand the difference between saving progress and completing a job, and how the checklist handles local data.

The Active Checklist is "Local-First"

The Service Checklist was intentionally engineered to run out of your device's local memory ('localStorage') rather than requiring a constant internet connection to the cloud database. This guarantees that if you are out in the field on your phone and lose cell service, you won't lose your progress every time you check a box.

- **Device Specific:** Because of this local-first design, you cannot start a checklist on your phone (or an incognito window) and pick it up on a different browser/computer. The active state is tied strictly to the exact browser you started it on.

Saving vs. Finishing

-  **Save Progress:** If you need to pause a job and pick it up later *on the same device*, use this button. It saves your active session locally without finalizing it.
-  **FINISH & COMPLETE JOB:** When you hit this button, the system immediately **ends the active detailing session**. It takes your local progress, archives it to a PDF, logs your materials to the database, creates the official Invoice, and **clears the active job out of your queue** so you can start the next vehicle.

Important: Because hitting "Finish & Complete" finalizes the session, that job is permanently closed out and sent to your Analytics/Invoice history. It will never reappear as an active job in your checklist queue after that button is pressed.

CHAPTER 21 • MENU

CLIENT PRE-SERVICE EVALUATION

CHAPTER SCOPE & OBJECTIVE:

Analyze vehicle condition and client needs before quoting.

Overview: A structured approach to assessing a vehicle's specific needs.

- **Condition Scoring:** Rate the interior and exterior to justify "Premium" surcharges.
- **Expectation Management:** Discuss scratches, stains, and realistic outcomes.

CHAPTER 22 • MENU

SHOP TASKS & REMINDERS

CHAPTER SCOPE & OBJECTIVE:

Internal to-do list for shop maintenance and follow-ups.

Overview: Manage daily chores that don't involve a customer vehicle.

- **Types:** "Buy more towels," "Clean bays," or "Call back John."
- **Reminders:** Set due dates to ensure critical operations aren't missed.

CHAPTER 23 • MENU

MOBILE SETUP (F150 COMMAND CENTER)

CHAPTER SCOPE & OBJECTIVE:

Manage your mobile detailing rig with visual setup guides and specialized equipment lists.

The Command Center: This page is designed for mobile detailing professionals operating out of a van or truck (e.g., your F150). It focuses on rapid inventory management and visual documentation of your rig.

1. Visual Setup Gallery

Capture walk-around videos or photos of your mobile rig setup. This is perfect for training new staff on exactly where tools and chemicals are stored on the truck.

- **Support & Sync:** All media is uploaded directly to Supabase and synced to your Shop PC instantly.
- **Direct Camera Source:** On mobile devices, the "Add View" button can trigger your camera directly for real-time rig audits.

2. Specialized Tracking

The "Equipment Pool" provides a streamlined view of your chemicals, tools, and materials. Use the "Quick Add" (+) icons to instantly register new equipment into the shop inventory without filling out long forms.

3. Supabase Sync Activity

The footer includes a live "Supabase Sync" indicator. When active, all changes you make on the truck are reflected immediately in the master Admin Dashboard.

CHAPTER 24 • MENU

MOBILE UNIT CONFIGURATION

CHAPTER SCOPE & OBJECTIVE:

Setup and inventory management for mobile detailing trucks.

Overview: Tailor the app for on-the-go detailing operations.

- **Tracking:** Manage supply levels specifically for your mobile van or trailer.
- **Efficiency:** Optimize your workflow for field service intake.

CHAPTER 25 • MENU

SHOP SETUP & CONFIGURATION

CHAPTER SCOPE & OBJECTIVE:

Manage fixed shop locations, equipment, and station layouts.

Your Physical Base: Use the Shop Setup section to document and manage your brick-and-mortar operations.

**1. Station Management**

Define the physical wash bays or detailing stations in your shop. This helps in delegating work to specific areas.

**2. Equipment Inventory**

Keep track of large assets like pressure washers, air compressors, and polishers assigned to the shop.

**3. Shop Layout**

Upload and view photos of your shop setup for training new employees on where everything belongs.

**4. Maintenance Logs**

Record maintenance performed on shop equipment to ensure zero downtime during busy seasons.

PART 3 OF 8

FINANCIALS, PRICING, INVOICING & PAYROLL

Commercial Operations, Bookkeeping & Profit Maximization

Estimates, payment acceptance portals, break-even financial models, tax accounting, service package tiering, job-cost analysis, and technician compensation calculators.

Contains 21 structured operational chapters.

CHAPTER 26 • MENU

ESTIMATES & QUOTES

CHAPTER SCOPE & OBJECTIVE:

Professional service quotes and pending estimates for prospects.

Overview: The Estimates system is designed to help you close deals before they become official bookings.

- **Creation:** Build professional PDF quotes for any service package or custom job with optimistic UI updates for instant rendering without loading screens.
- **Discounts:** ALL discount coupons apply strictly to **Detail Service Packages ONLY**. Add-Ons (e.g., Pet Hair Removal, Engine Bay, Leather Conditioning) are NEVER discounted and are added at 100% full price after discounting the base service package (e.g. \$327 service - 10% = \$294 + \$94 Pet Hair Removal = \$388.00 total).
- **Tracking & CRM Sync:** Monitor which estimates are pending or sent. Toggling the "Sent" status automatically writes a corresponding Engagement Audit log to the client's CRM history.
- **Conversion:** With one click, turn an approved estimate into an active job and invoice.

CHAPTER 27

HOSTED ESTIMATE ACCEPTANCE PORTAL

CHAPTER SCOPE & OBJECTIVE:

A secure, guest-accessible webpage where customers can review and accept their estimates online.

The Hosted Estimate Portal is a major upgrade to how you close deals. Instead of asking customers to reply to an email or call you, they now interact with a secure webpage.

🌐 How It Works

1. When you generate an Estimate PDF, the system automatically creates a unique, secure URL (e.g., `/estimate/123-abc`).
2. You click **"Copy Hosted Link"** in the Estimates CRM and paste it into your email template.
3. The customer clicks the link in their email and is taken to a beautiful, branded webpage. **They do not need to log in.**

✅ The Acceptance Process

On the portal, the customer can:

- Review the total price, services, and any discounts.
- Click **"Accept Estimate"**.
- Fill out a mandatory **Pre-Check Form** (confirming vehicle condition, clearing out personal items, and acknowledging paint risks).

🚀 What Happens After Acceptance?

Once they submit the form:

- The Estimate is instantly marked as **"Approved"** in your CRM.
- Their Pre-Check answers are permanently attached to the Estimate Notes for you to review before the job.
- Both you and the customer receive an automated confirmation email.

CHAPTER 28 • MENU

INVOICING & PAYMENTS

CHAPTER SCOPE & OBJECTIVE:

Master billing, payment tracking, tips, profitability fields, and professional receipts.

Overview: The Invoicing page is the complete billing command center for Prime Auto Detail. It covers the full lifecycle from invoice creation to final payment collection, profitability tracking, and tip recording.

 1. Creating an Invoice

- **+ New Invoice:** Click the green button in the top-right to open the invoice builder.
- **Auto-Generation:** Invoices are automatically created when you click "Finish & Complete Job" in the Service Checklist. These appear in the list immediately.
- **From Estimates:** Any approved Estimate can be converted to an invoice in one click from the Estimates page.
- **Manual Entry:** Add the customer, vehicle, service line items, and price manually when creating from scratch.

 2. Services, Add-Ons & Discounts

- **Line Items:** Add multiple service lines (e.g., Prime Essential + Pet Hair Removal + Engine Bay). Each has an individual price.
- **Discounts:** Apply a percentage (e.g., 10% Friends & Family) or fixed-dollar discount. ALL discounts apply strictly to **Detail Service Packages ONLY**. Add-Ons are NEVER discounted and are always added at 100% full price after discounting the base service package.
- **Price Lock:** Toggle the "Lock Price" switch to freeze the invoice total at a specific amount, preventing any further auto-recalculation.
- **Adjustment:** Use the Adjustment field to add a small surcharge or credit (e.g., +\$25 for excessive pet hair) without creating a new line item.

 3. Sending the Invoice

- **CRM Sync:** Toggling "Mark as Sent" permanently logs this action to the customer's Engagement Audit Trail in their CRM profile.
- **Email:** Click the envelope icon on any invoice card to send the invoice to the customer by email directly from the app.
- **Share Link:** Click the link icon to copy a shareable Customer Invoice URL. Text or WhatsApp it to the customer so they can view it from their phone.
- **Print / PDF:** Click the print icon to open the browser print dialog. Select "Save as PDF" to generate a professional invoice PDF.

 4. Recording Payment

- **Record Payment Button:** Open any invoice and click the large "Record Payment" (or "Record Additional Payment / Tip") button at the bottom of the right-hand panel.
- **Payment Amount:** Enter the dollar amount received (Cash, Card via Stripe, Zelle, etc.).
- **The Tip Field:** Directly below the Payment Amount is a separate **Tip Amount** field. Enter any gratuity the customer left here. This amount is stored privately and is NEVER shown on the customer-facing invoice.
- **Cumulative:** You can record multiple partial payments over time. Each press of "Record Payment" adds to the running total.

 5. Editing Paid Amount & Tips (After the Fact)

- If you already recorded a payment but need to correct or add a tip you forgot:
 1. Open the invoice in the right-hand detail panel.

2. Scroll down to the "Amount Paid" line.

3. **Hover over the line** — a small Pencil  icon will appear.

4. Click the Pencil icon to open the inline edit mode.

5. You will see two fields: **Paid Amount** and **Tip Amount**. Edit either and save.

- This is exactly how you can see and verify the \$3 tip recorded for Annie MacWilliams — hover the Amount Paid line on her invoice and click the pencil.

6. Tips in Analytics

- All recorded tips automatically appear in the **Time & Profitability** page under the "Customer Tips" section.
- The system detects a tip in two ways: (a) a value in the Tip Amount field, or (b) a paidAmount that exceeds the invoice total.
- The Tips table shows: Date, Customer Name, Invoice Total, and the Tip amount. The section header shows your all-time tip total.
- Clicking any row in the Tips table navigates directly to that invoice.

7. Profitability & Time Tracking Fields (Admin)

- Open any invoice in edit mode to reveal the advanced profitability section:
- **Hours Worked:** Enter the actual time spent on the job (e.g., 2.5 hours). This data feeds the Time & Profitability dashboard.
- **Hours Method:** Tag how you tracked time — Manual entry, Job Timer, or Estimated.
- **Product Cost:** Enter the total dollar value of chemicals and materials consumed. This calculates your true profit margin.
- **Stripe Net Payout / Stripe Fee:** If the customer paid via Stripe, log the actual net payout and fee for exact profit-per-hour calculations.
- **Assign Employee:** Link this invoice to a specific technician for compensation tracking.

8. Invoice List & Filters

- **Date Filter:** Use the "All Time", "Today", "This Week", "This Month" buttons or the Custom Range picker to filter the invoice list.
- **Search:** Type any customer name to instantly filter the list.
- **Show Archived:** Toggle "Show Archived" to see invoices you've archived. Archived invoices are hidden by default to keep the dashboard clean.
- **Outstanding / Revenue Totals:** The header shows real-time totals for Outstanding balance (unpaid invoices) and Total Revenue collected.

9. Invoice Toolbar Icon Guide

Each invoice card has a row of icon buttons:

-  **Pencil** — Edit the invoice details (services, discounts, notes).
-  **Eye** — Preview the customer-facing invoice as they would see it.
-  **Printer** — Print or save as PDF.
-  **Floppy Disk** — Save/archive the invoice.
-  **Envelope** — Email the invoice to the customer.
-  **Link** — Copy the shareable customer invoice URL.
-  **Trash** — Permanently delete the invoice (a confirmation dialog will appear first).

10. CRM & Audit Trail Sync

- Marking an invoice "Sent" writes a permanent activity log to the customer's profile timeline.
- This ensures a full audit trail: Booking → Estimate → Invoice Sent → Payment Received.
- This audit log is visible from the customer's profile in the Prospects or Customers page.

 **Pro Tip:** For in-person cash payments, collect the money, then open the invoice and click "Record Payment." Enter the cash amount received, and add any tip in the Tip field. If they left no tip, leave it blank. The status will auto-flip to "Paid" once the paidAmount meets or exceeds the invoice total.

CHAPTER 29

HOSTED INVOICE PAYMENT PORTAL

CHAPTER SCOPE & OBJECTIVE:

A secure, Stripe-integrated webpage allowing customers to instantly pay their invoices online.

The **Hosted Invoice Portal** streamlines your billing process by allowing customers to securely pay via credit card directly from their phone or computer.

📄 How It Works

1. When you generate an Invoice PDF, the system generates a secure URL (e.g., `/invoice/123-abc`).
2. You click **"Copy Hosted Link"** in the Invoicing CRM and send it to the customer.
3. The customer opens the webpage (no login required) and clicks **"Pay Invoice Now"**.

🔒 Stripe Integration & Security

- The portal automatically redirects the customer to a secure **Stripe Checkout Session**.
- Prices, discounts, and line items are calculated purely on your secure server, preventing any tampering.

💰 What Happens After Payment?

When the customer successfully pays via Stripe:

- The Invoice in your CRM is instantly marked as **Paid** with a special `PAID VIA STRIPE (ONLINE)` badge.
- A permanent Engagement Audit Trail log is created.
- An automated notification email is sent to you (the Admin) confirming the successful payment.
- A receipt is automatically emailed to the customer by Stripe.

CHAPTER 30 • MENU

QUICK PAY (IN-PERSON PAYMENTS)

CHAPTER SCOPE & OBJECTIVE:

Collect payments immediately from your mobile device or shop desk.

On-the-Spot Revenue: Quick Pay is designed for rapid transactions where you need to collect money without first generating a formal invoice or booking.

1. How to Initiate

Open the Quick Pay modal from the sidebar or right-hand utility menu. Enter the dollar amount you wish to charge.

2. Active Service Suggestions

If you have just completed a job in the **Service Checklist**, the Quick Pay modal will automatically suggest the total amount calculated for that job. This saves you from having to remember or re-type the total.

3. Customer Association

You can optionally select a customer from your database to link the payment to. This is highly recommended as it ensures the revenue appears in that customer's lifetime spending reports.

4. Tip Selection & Checkout

Once the amount is set, you will be taken to the Tip Selection screen. The customer can choose a percentage or custom tip before you process their card or cash.

CHAPTER 31 • MENU

BUSINESS ACCOUNTING

CHAPTER SCOPE & OBJECTIVE:

Analyze revenue, expenses, and net profitability in real-time.

Overview: A comprehensive ledger of your shop's financial health.

- **Revenue:** Track Gross Income across daily, weekly, and monthly views.
- **Expenses:** Categorize business costs from rent to chemical supplies.
- **Profitability:** Monitor Net Profit after all expenses and taxes are accounted for.

CHAPTER 32 • MENU

FINANCIAL SUMMARY & VALUATION

CHAPTER SCOPE & OBJECTIVE:

How the Business Summary is calculated and why it balances to \$0.00.

Net Valuation Model: Your business uses a "Portfolio Value" approach to simplify initial capital investment tracking.

**The Formula**

``Financial Position = (Cash Revenue + Inventory Assets) - Total Operating Expenses``

**Why is my summary Balanced (\$0.00)?**

When you start your business and purchase equipment or chemicals, your cash goes down, but your **Inventory Assets** go up by the exact same amount.

- Because the money is now stored in your gear rather than your pocket, your net business value remains \$0.00.
- As you earn revenue (Cash In) without spending it, your **Surplus** will increase.

Overview: This model ensures that spending on equipment doesn't look like a "Loss" as long as that equipment is still in your inventory and has value.

CHAPTER 33 • MENU

NET PROFIT & VALUATION BREAKDOWN

CHAPTER SCOPE & OBJECTIVE:

Understand how your profit, expenses, and asset valuation are calculated.

The Financial Formula: Your business uses a "Valuation-Based" profit model to track overall health.

 1. Total Revenue

This is the sum of all **Paid Invoices** and **Manual Income** entries recorded in the system.

 2. Total Expenses (The Cost Basis)

To accurately reflect your investment, the system combines two cost types:

- **Manual Expenses:** Overhead costs like Rent, Insurance, and Payroll.
- **Inventory Valuation:** The current dollar value of your entire shop inventory (Chemicals, Supplies, and Equipment). This ensures that items you already own aren't "double-counted" when you mark them for tax purposes.

 3. The Calculation

- **Formula:** `Net Profit = Total Revenue - (Operating Expenses + Inventory Value)`

 **Why include Inventory?:** By treating your inventory as an investment, the system shows you exactly how much revenue is needed to recover the cost of your tools and chemicals before you are in the green.

 **Multi-Vehicle Logic:** To add more vehicles to a customer profile without touching code, go to the **Prospects** or **Customers** page, edit the client, and use the vehicle manager there. In the public booking flow, the "Add Another Vehicle" button allows customers to book multiple cars at once.

CHAPTER 34 • MENU

EMPLOYEE PAYROLL

CHAPTER SCOPE & OBJECTIVE:

Manage technician commissions, hourly pay, and disbursements.

Overview: Accurately calculate and track what is owed to your team.

- **Commissions:** Automatically calculate technician pay based on tier-specific rates.
- **Hours:** Track clock-in/out times for hourly employees.
- **Status:** Mark payments as Pending, Processing, or Paid with date stamps.

CHAPTER 35 • DASHBOARD

COMPENSATION CALCULATOR

CHAPTER SCOPE & OBJECTIVE:

Intelligently calculate employee compensation based on Labor Revenue to protect business profitability.

Compensation Calculator: This module allows you to calculate fair employee compensation based on Labor Revenue rather than Gross Job Price.

**1. The Live Calculator**

The core of the system is the Live Calculator. It ensures employees are paid from the remaining Labor Revenue after all real business costs (materials, shop supplies, stripe fees) have been deducted.

- **Employee Stripe Share:** You can adjust what percentage of the credit card processing fee is absorbed by the employee versus the company before their commission is calculated.

**2. Active Employees**

Manage your team's base compensation structures. You can assign different roles (Standard Tech, Lead Tech, Independent Contractor) which carry recommended commission ranges.

**3. Templates & Settings**

Create standardized pay templates for common job types to speed up payroll processing. Use Company Settings to define your default shop costs and target profit margins.

Philosophy: The system enforces the rule that Employee Pay should never be calculated from Total Customer Price, protecting the profitability of the business.

CHAPTER 36 • DASHBOARD

TIME & PROFITABILITY DASHBOARD

CHAPTER SCOPE & OBJECTIVE:

Learn how to track actual earnings vs time spent, backfill historical jobs, and find your lowest-performing services.

The Analytics Engine: This dashboard helps you determine exactly what your time is worth by comparing gross revenue and net payout against actual hours worked.

 1. The Summary Widgets

- **Revenue/Hour:** Your gross earnings divided by tracked hours.
- **Net Payout/Hour:** Your true earnings after Stripe fees are deducted.
- **Profit/Hour:** Net payout minus the cost of products used.

 2. Backfill Historical Data

Click the blue "Backfill Historical Data" button to pull up a bulk list of all past jobs that are missing hours-worked data. You can rapidly type the hours and cost for each and save them directly from the list. This instantly updates your entire dashboard's accuracy without making you click into each individual invoice.

 3. The Drag List (Red Section)

This list highlights your absolute lowest \$/Hour performing jobs. These are the jobs dragging down your average. Review these constantly to identify services that are taking too long or are chronically underpriced.

 4. Stripe Fee Tracking & Badges

For jobs paid via cash or Zelle, your Net Payout exactly equals your Revenue. For Stripe payments, the fee is deducted from the Net Payout. When this happens, a small red badge will appear on the breakdown charts showing exactly how much was lost to Stripe fees for that specific segment.

CHAPTER 37 • MENU

COMPANY BUDGET

CHAPTER SCOPE & OBJECTIVE:

Define and track spending limits across business departments.

Overview: Fiscal planning to ensure operational sustainability.

Targets: Set monthly budgets for Supplies, Marketing, and Equipment.

Actual vs. Planned: Compare real-time spending against your established goals.

Forecasting: Analyze seasonal trends to plan for upcoming peak periods.

CHAPTER 38 • MENU

BREAK-EVEN ANALYSIS

CHAPTER SCOPE & OBJECTIVE:

Understanding the math behind your shop's profitability.

FINANCIAL HEALTH & BREAK-EVEN METRIC MODEL

Key business metrics tracked by the financial analytics engine.

FINANCIAL METRIC	TARGET FORMULA	OPTIMAL SHOP BENCHMARK	MOBILE UNIT BENCHMARK
Gross Profit Margin	$(\text{Revenue} - \text{COGS}) / \text{Revenue}$	75% - 85%	80% - 90%
Labor Efficiency Ratio	$\text{Labor Revenue} / \text{Total Labor Cost}$	3.5x - 4.5x	4.0x - 5.0x
Chemical Cost Per Job	$\text{Chemical Usage} / \text{Completed Jobs}$	\$4.50 - \$8.00	\$6.00 - \$11.00
Drive Cost Allowance	$\text{IRS Standard Mileage Rate} \times \text{Miles}$	N/A (Fixed Facility)	\$0.67 / mile tracked
Monthly Break-Even Point	$\text{Fixed Overhead} / \text{Gross Margin \%}$	\$4,500 - \$6,500	\$2,500 - \$3,800

The Profitability Goal: Break-Even Analysis is the "finish line" where your total revenue finally matches every dollar you spent to start and run the business.

**1. Total Investment (Costs)**

The system tracks two types of costs to calculate your break-even point:

- **Inventory Assets:** The total dollar value of every chemical, towel, and tool currently on your shelves. This is considered "tied-up" capital.
- **Operating Expenses:** Recurring costs like rent, insurance, marketing, and payroll that you've logged in the ledger.

**2. Total Service Revenue**

This is the sum of every **Paid Invoice** and **Manual Income** entry since the business began. It represents the "fuel" that pays off your investment.

3. The Calculation

- **Remaining to Break-Even:** $(\text{Inventory} + \text{Expenses}) - \text{Total Revenue}$. If this number is positive, you are still "paying back" your initial costs.
- **Profit Beyond Costs:** Once your revenue exceeds your costs, this turns into green "Profit." This means the business has officially paid for itself!

Pro Tip: To reach break-even faster, focus on high-margin "Add-on" services (like Ceramic Coatings) which use very little inventory but generate significant revenue.

CHAPTER 39 • MENU

TAX PREPARATION

CHAPTER SCOPE & OBJECTIVE:

Collect deductible expenses and sales tax for quarterly filings.

Overview: Stay organized for tax season throughout the year.

- **Expense Tracking:** All business and inventory purchases are automatically logged.
- **Sales Tax:** Track state and local tax collectables from every invoice.
- **Exports:** Generate comprehensive "Tax Ready" reports for your accountant.

CHAPTER 40 • MENU

TAX & SALES TAX SUMMARY

CHAPTER SCOPE & OBJECTIVE:

Data preparation for state and federal tax filings.

Overview: Accurate data for your accountant and quarterly filings.

- **Sales Tax:** Total sales tax collected from clients, broken down by jurisdiction.
- **Deductions:** Total business expenses categorized for IRS Schedule C.
- **Export:** One-click "Tax Bundle" PDF generation for easy filing.

CHAPTER 41 • MENU

SERVICE & PACKAGE PRICING

CHAPTER SCOPE & OBJECTIVE:

Manage master pricing for packages, add-ons, multipliers, and human-readable audit history.

SERVICE PACKAGE MATRIX & VEHICLE SIZING TIERS

Tiered service packages with vehicle category multiplier baselines.

PACKAGE NAME	EST. TIME	COUPE / COMPACT	SEDAN / MID SUV	FULL TRUCK / 3-ROW	LUXURY / EXOTIC
Express Clean & Protect	1.5 - 2 hrs	\$129.00	\$149.00	\$179.00	\$199.00
Interior Deep Sanctuary	2.5 - 3.5 hrs	\$199.00	\$229.00	\$269.00	\$299.00
Exterior Precision Gloss	2.0 - 3.0 hrs	\$189.00	\$219.00	\$259.00	\$289.00
Full Prime Essential	4.0 - 5.5 hrs	\$329.00	\$369.00	\$429.00	\$489.00
Signature Ceramic Package	6.0 - 8.0 hrs	\$649.00	\$729.00	\$849.00	\$999.00

Overview: The Package Pricing page is the central command center for all pricing across the application. Any changes made and saved here will instantly ripple through the entire CRM, updating the Phone Assistant, Client Evaluation scripts, Invoice generators, and the live Customer Booking Portal.

1. How Pricing Architecture Works

- Centralized Base Prices:** The system relies on hardcoded base prices. This page acts as an "Override Manager".
- Overrides:** When you set a new price here and hit "Save," it creates an "override" in your local browser and cloud storage. The application will ALWAYS prioritize your overrides over the default code.
- The Reset Button:** "Reset" is NOT a factory reset. It simply acts as an "Undo" button, returning any unsaved numbers in the boxes back to your last official Save Point.

2. Percentage Adjustments (5% & 10%)

- Independent Adjustments:** You can use the "Apply 5%" or "Apply 10%" buttons to quickly increase prices for a specific package.
- Rounding Logic:** The system uses a strict "Ceiling Rounding" formula (`Math.ceil``). This guarantees that any calculation producing change (e.g., \$255.50) will instantly jump up to the next whole dollar (e.g., \$256). **No loose change!**
- Sequential Compounding:** The percentage increases calculate based on whatever price is *currently saved*. If you raise a price and save it, the next time you hit "Apply 10%", it will calculate 10% from the new, higher baseline.

3. Manual Overrides

- Total Independence:** You are never forced to use percentages. Every box is independent. You can manually type \$99 in Compact, \$500 in Truck, lower a different package to \$50, and leave everything else untouched.
- Zero Interruption:** Changing one price manually will *never* break or recalculate the other packages unless you explicitly tell the system to do so.

4. Saving and Restoring

- Saving:** Once you are satisfied with your edits, click "Save" on the individual package, or "Save All" at the top right. This locks the prices in permanently.
- Restore Pricing from JSON:** If you ever want to revert everything back to a previous state, use the "Backup as JSON" button before you make big changes. You can then use "Restore Pricing from JSON" to instantly load those old prices back

into the system.

5. Human-Readable Audit Trail

- **Clear Activity Log:** Rather than tracking vague system codes, manual price history logs translate entries into readable statements showing the exact service package name, vehicle classification, and final price (e.g., `Saved changes: Prime Essential Interior (Compact) to \$185`). You can edit the description of these logs or delete records instantly.

6. Smart Sync Comparison (Clean Git Workspace)

- **Git Cleanliness:** Integrates dynamic comparison logic inside the mock server that blocks redundant file writes to `packagesLive.json` if sync data matches the active state. This keeps your local development and Git tree 100% clean and pristine unless an actual price change is saved.

7. Automated Class Mappings

- **Vehicle Class Pricing:** The booking engine automatically associates pricing for Compact, Midsize, Truck, and Luxury classifications directly from your saved package rates. You never have to manually map or program size rules.

CHAPTER 42 • MENU

PACKAGE COMPARISON TOOL

CHAPTER SCOPE & OBJECTIVE:

Visual side-by-side comparison of your detailing services.

Overview: Help customers choose the right level of care for their vehicle.

- **Essential vs Elite:** Clearly show what is included in each tier.
- **Up-selling:** Highlight the value of ceramic coatings and paint correction.

CHAPTER 43 • MENU

VEHICLE TYPE CLASSIFICATION

CHAPTER SCOPE & OBJECTIVE:

Standardized categories for accurate pricing and estimates.

STANDARD VEHICLE CLASSIFICATION REFERENCE

Guidelines for vehicle size classification to ensure consistent pricing calculation.

CLASS CODE	CATEGORY NAME	TYPICAL EXAMPLES	PRICING MULTIPLIER	SURFACE AREA NOTES
CLASS-1	Compact / Coupe	Mazda Miata, Porsche 911, Honda Civic 2D	1.0x (Base)	Standard 2-door or compact footprint
CLASS-2	Mid-Size Sedan / Small SUV	Toyota Camry, BMW 3/5 Series, Toyota RAV4	1.15x	4-door sedans, 2-row crossovers
CLASS-3	Full-Size Truck / 3-Row SUV	Ford F-150, Chevy Tahoe, Toyota Highlander	1.30x	Extended cabs, 3rd row seating, truck beds
CLASS-4	Heavy Duty / Commercial	Ford F-350 Dually, Mercedes Sprinter Van	1.60x	High roofs, dual rear wheels, heavy cargo area
CLASS-5	Exotic / Bespoke	Ferrari, Lamborghini, Rolls-Royce Phantom	1.50x - 2.0x	Delicate materials, carbon fiber, soft paint

Overview: Ensure every vehicle is billed at the correct size-rate.

- **Classes:** Define which vehicles are Sedans, Large SUVs, or Trucks.
- **Multipliers:** Set auto-adjustments for extra large or complex vehicles.

CHAPTER 44 • MENU

ADD-ON & UPSELL SCRIPTS

CHAPTER SCOPE & OBJECTIVE:

Maximize every ticket with professional service recommendations.

Overview: Proven scripts to add \$50-\$200 to every detailing booking.

- **Engine Bay Detailing:** How to suggest it based on vehicle age.
- **Pet Hair Removal:** Handling surcharges professionally.

CHAPTER 45 • MENU

PHONE ASSISTANT UTILITY

CHAPTER SCOPE & OBJECTIVE:

Quick-access scripts and tools for handling customer inquiries.

Overview: Use this floating assistant to ensure professional communication during every call.

- **Inquiry Scripts:** Follow proven conversation paths for pricing and availability.
- **Lead Capture:** Instantly save contact info without leaving the active call.

CHAPTER 46 • MENU

MILEAGE TRACKER

CHAPTER SCOPE & OBJECTIVE:

IRS-compliant mileage logs for business travel and mobile units.

Overview: Ensure accurate travel records for tax deductions and vehicle maintenance.

- **Logging:** Record starting and ending odometer readings for mobile service calls.
- **Categorization:** Tag trips as Customer Service, Supply Runs, or Maintenance.
- **Reporting:** Export monthly mileage summaries for tax preparation.

PART 4 OF 8

CHEMICALS, DILUTION & INVENTORY CONTROL

Chemical Science, Safety, Ratios & Supply Chain

The master source-of-truth dilution engine, chemical decision matrix, automated label maker, inventory audit checklists, and materials consumption tracking.

Contains 23 structured operational chapters.

CHAPTER 47 • MENU

MASTER INVENTORY CONTROL

CHAPTER SCOPE & OBJECTIVE:

Track chemicals, supplies, and equipment in real-time.

Overview: Prevent job delays by always having the right materials.

- **Tracking:** Manage "Current Stock" and "Low Thresholds" for chemicals.
- **Value:** Monitor the total liquid value of your chemical shelf.

CHAPTER 48 • MENU

INVENTORY CONTROL

CHAPTER SCOPE & OBJECTIVE:

Maintain supply levels, set thresholds, and track usage.

Monitor critical inventory counts and restock reminders in alerts.

Strict Classification: Items must be explicitly marked as "Tool" (Assets/Equipment) or "Material" (Consumables/Supplies).

Lifecycle Distinction: Assets are durable/long-term; Consumables are one-time use or depletable.

Powered Equipment: All powered machinery must be classified as a Tool for proper maintenance tracking.

Update item details and categories with unified modals.

Link inventory usage to jobs for accurate tracking.

Responsive tables ensure full visibility on mobile devices.

CHAPTER 49 • CHEMICALS

CHEMICAL DESCRIPTION & TIPS

CHAPTER SCOPE & OBJECTIVE:

How to quickly find, read, and manage detailed descriptions and safety notes for your chemicals.

Overview

The Chemical Description section (also known as Rick's Tips) is your team's primary resource for detailed safety, usage, and dilution information for every chemical in your shop.

How to Access the Section

- **The Quick Shortcut:** From anywhere in the app, open the Right Slide-out Sidebar (the app menu on the right) and click the "**Chem Desc**" icon (Book icon). This instantly opens the modal and drops you straight into the Description tab without navigating through the main menu.
- **From the Library:** You can also access it by clicking the 'Rick's Tips' button on any chemical card.

How to Find a Chemical Quickly

Once the modal is open, use the **Searchable Dropdown** at the top:

1. Click on the chemical selection dropdown.
2. Instead of scrolling through the entire list, **type** the name or brand of the chemical into the search box that appears.
3. The list will instantly filter. Click your desired chemical to load its profile.

Reading the Descriptions (75/25 Layout)

The screen is divided to maximize readability:

- **Top 75% (Description):** Focuses on the primary use case, safety warnings, and professional application tips.
- **Bottom 25% (Dilution Notes):** Reserved specifically for ratio instructions and mixing guidelines.

Editing Descriptions (Admins Only)

If you are an Admin, you can edit these fields directly:

1. Select a chemical using the searchable dropdown.
2. Click inside the text areas and type your custom shop guidelines.
3. Click the "**Save Updates**" button. The updates are instantly visible to all employees.

CHAPTER 50 • CHEMICALS

CHEMICAL DOCUMENTATION V3

CHAPTER SCOPE & OBJECTIVE:

Master the dual-export engine for Standard Prints and Premium Digital PDFs.

Version 3 Stability: We have upgraded the export engine to provide the best of both worlds: high-contrast physical copies and branded digital masterpieces.

 1. 'Standard Doc' Printing (Green Icon)

Use the Emerald Printer icon for physical shop references. It generates a clean, black-on-white layout modeled after a Word or Google Doc. This saves ink and ensures maximum clarity on paper.

 2. 'Premium Digital' PDF (Blue Icon)

Use the Sky Blue PDF icon for digital sharing or tablets. This preserves the premium 'Dark Mode' branding of the app, complete with vibrant colors, rounded borders, and professional glassmorphism.

 3. Sectioned Exporting

You can now download sections individually: Package Advice, Chemical Descriptions, or the full Job Setup chart can be exported as standalone documents for your team.

 4. Master Catalog Export

Use the 'Save Master Catalog' button to generate a comprehensive 30+ page manual of every chemical and package in your shop, automatically formatted with page breaks and headers for professional binding.

 5. Batch PDF Exports & Layout Stability

Use the new Batch Print Modal to selectively batch print/PDF specific chemicals rather than the entire library. The export engine automatically handles page breaks, ensuring that text lines do not wrap incorrectly or get cut off mid-sentence.

CHAPTER 51 • CHEMICALS

MASTER RATIO: SOURCE OF TRUTH

CHAPTER SCOPE & OBJECTIVE:

Learn which settings control your chemical ratios and how they sync across the shop.

Where is the "Master" Ratio?: To ensure your shop always uses the correct mix, the system follows a 3-tier hierarchy of priority:

 UNIVERSAL BIDIRECTIONAL SYNC

Any change you make ANYWHERE—in the **Prime Dilution Chart**, on a **Chemical Detail Card**, or in the **Inventory Table**—instantly propagates everywhere. Every linked view is now a mirror of the others.

- **The Master Chart:** Update here for shop-wide training guides.
- **Chemical Cards:** Fix ratios here to update your library and shelf inventory simultaneously.
- **Inventory Table:** Quick edits in the list view flow back to the parent card.

 **Automatic Linking:** When you create a card in the **Knowledge Base**, it automatically finds and links itself to any matching inventory on your shelf. You only ever need to update the ratio once to stay in sync!

CHAPTER 52 • MENU

DILUTION REFERENCE CHART

CHAPTER SCOPE & OBJECTIVE:

Quick-access printable reference for chemical ratios.

PRIME MASTER CHEMICAL DILUTION REFERENCE TABLE

Standard dilution ratios for high-volume detailing chemicals used in shop and mobile operations.

CHEMICAL / PRODUCT	RATIO	OUNCES PER 32OZ BOTTLE	WATER FILL LINE	TARGET SURFACES & PURPOSE
All-Purpose Cleaner (Heavy)	1:4	6.4 oz	25.6 oz	Wheels, tires, engine bay, heavy grease
All-Purpose Cleaner (Medium)	1:10	2.9 oz	29.1 oz	Door jambs, rubber floor mats, pedals
Interior Cockpit Cleaner	1:16	1.9 oz	30.1 oz	Dashboard, console, vinyl door cards
Leather Cleaner (Gentle)	1:20	1.5 oz	30.5 oz	Coated leather, stitch seams, steering wheels
Glass Cleaner Concentrate	1:10	2.9 oz	29.1 oz	Streak-free tint-safe glass & mirrors
Iron Decon / Fallot Remover	RTU (1:0)	32.0 oz	0.0 oz	Paint decontamination, brake dust release
Clay Lube / Rinseless Wash	1:64	0.5 oz	31.5 oz	Mechanical clay bar lubrication, dry dusting
Ceramic Spray Sealant	RTU (1:0)	32.0 oz	0.0 oz	Gloss enhancement, hydrophobicity layer

Overview: A condensed view of all shop dilution ratios.

- Layout:** Organized by brand and task for rapid identification.
- Print:** Designed to be printed and posted in the chemical room.

CHAPTER 53 • MENU

PRIME DILUTION CALCULATOR

CHAPTER SCOPE & OBJECTIVE:

Accurate ratio math for every chemical in your cabinet.

Overview: Eliminate waste and ensure product safety with precise calculations.

- **Input:** Enter your bottle size and desired ratio (e.g., 4:1).
- **Output:** Get exact ounces of chemical and water needed for the perfect mix.

CHAPTER 54 • CHEMICALS

PRIME DILUTION MASTERCLASS

CHAPTER SCOPE & OBJECTIVE:

The ultimate guide to detailing chemistry, mix ratios, and laboratory-grade precision.

Chemistry Over Elbow Grease: Detailing is as much about chemistry as it is about effort. Using too much product wastes money and can damage surfaces. Using too little results in poor cleaning performance.

 **The Golden Rule:** Always add water first, then your chemical. This prevents excessive foaming and ensuring accurate volume measurement.

 Technical Ratio Mode (X:1):

This is the standard detailing method. A ratio like **4:1** means **4 parts water** to **1 part product**. To use it, simply enter your total container size and the ratio number.

 Understanding Percentage Mode (%):

Some manufacturers provide instructions in percentages (e.g., a "20% solution"). Our tool automatically converts that 20% into the equivalent technical ratio of 4:1 so you don't have to do the mental gymnastics.

 The Swap Trick (Power User Maneuver):

Ever had just a little bit of product left? Hit the **Swap** icon. Instead of Container Size, you enter the **Product Amount** you have, and the tool tells you exactly how much water is needed to finish the mix perfectly.

 Reverse Mixing (Audit Logic):

Need to check a pre-mixed bottle? The **Reverse** icon flips the ratio logic instantly, allowing you to audit your inventory or verify unusual manufacturer specs against existing liquid levels.

 Standard Detailing References:

- **APC (Heavy Duty):** 4:1 — For engine bays, wheel wells, and heavy degreasing.
- **APC (Medium/Daily):** 10:1 — The safe standard for interiors, leather, and carpets.
- **Glass Cleaner:** 5:1 — Optimized for clarity without streaks or tint damage.
- **Drying Aid / Clay Lube:** 20:1 — High lubricity for paint safety with minimal residue.

 **Professional Standards:** Using this calculator ensures that your costs are controlled and that every surface you touch is treated with the exact chemical balance required for safety and performance.

CHAPTER 55 • MENU

INTERACTIVE DILUTION MANAGER

CHAPTER SCOPE & OBJECTIVE:

Real-time ratio adjustment and global synchronization.

Overview: The master control for all shop chemical formulas.

- **Live Edits:** Change a ratio here to update labels and cards globally.
- **Calculations:** Automatically updates derived volumes on the label maker.

CHAPTER 56 • MENU

CHEMICAL RATIO MODAL

CHAPTER SCOPE & OBJECTIVE:

Focused view of chemical dilutions for quick reference.

Overview: Essential ratio data at your fingertips.

- **Quick Edit:** View and confirm ratios before mixing a new bottle.
- **Clarity:** High-contrast display for use in bright shop environments.

CHAPTER 57 • CHEMICALS

CHEMICAL DECISION SYSTEM

CHAPTER SCOPE & OBJECTIVE:

The master workflow for identifying contamination and selecting the perfect chemical response.

Philosophy: Precision Detailing requires the right chemistry for the right condition. This system eliminates guesswork and protects vehicle surfaces.

1. Severity Assessment

Start by grading the vehicle condition from Light to Severe. The system adjusts its Ph-recommendations and dilution ratios based on this initial assessment.

2. Contamination ID

Identify the specific problem (Bugs, Tar, Water Spots, etc.). The system identifies the required chemistry (Alkaline, Acidic, Solvent, or Ph-Neutral) needed to emulsify that specific contaminate.

3. Inventory Matching

The system scans your on-hand stock and highlights the exact chemicals you own that match the required profile. It even provides the specific dilution ratio adjusted for your assessed severity.

CHAPTER 58 • CHEMICALS

AI CHEMICAL ASSISTANT

CHAPTER SCOPE & OBJECTIVE:

Harness real-time AI to solve complex contamination issues and verify chemical compatibility.

The Digital Consultant: Your AI assistant combines real-time detailing search results with your specific shop inventory to provide expert guidance.

1. Inventory-Aware Reasoning

The AI doesn't just give generic advice. It knows exactly what is on your shelves. If you ask "How do I fix tree sap?", it will check your stock and recommend your specific solvent or APC first.

2. Substitution Logic

Not sure if you can use Product A instead of Product B? Ask the AI. It analyzes Ph-levels and surfactant types to warn you about potential surface damage or cleaning failure.

3. Safety & Ph-Balance

The AI prioritize substrate safety. It will warn you about working on hot panels or using high-alkaline cleaners on sensitive metals like raw aluminum.

CHAPTER 59 • MENU

CHEMICAL KNOWLEDGE CARDS

CHAPTER SCOPE & OBJECTIVE:

Detailed MSDS and usage guides for every product.

Overview: The "Encyclopedia" of your chemical cabinet.

- **Dilution Logic:** View exact ratios for light, medium, and heavy cleaning.
- **SOPs:** Safety protocols and application techniques for specific brands.

CHAPTER 60 • CHEMICALS

CHEMICAL CARDS (KNOWLEDGE BASE)

CHAPTER SCOPE & OBJECTIVE:

Master every product in your arsenal with safety data, professional guides, and high-precision sorting.

The Knowledge Base: This is your shop's digital encyclopedia for every chemical you use.

 **Finding Products:** Use the search bar to find products by Name, Brand, or Usage. Use the **Jump to Brand** dropdown to quickly isolate all products from a single manufacturer like Meguiar's or P & S.

 **Dilution Standards:** Ratios shown here are pulled from the **Master Source of Truth**. While these cards show your global standards, any specific overrides you set in the **Prime Dilution Chart** (Inventory) will take precedence here.

 **Bulk Printing:** Click "**PDF ALL**" to generate a complete shop manual containing every chemical card in our official 2-page training format. Great for training binders!

 **AI Integration:** Click the "AI" icon on any card to automatically generate professional descriptions, usage guides, and safety warnings based on the product name.

CHAPTER 61 • CHEMICALS

CHECKLIST CHEMICAL MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Learn how to manage chemicals for each service step with auto-save and AI suggestions.

Service Checklist Chemicals: You can now precisely manage which chemicals are used for every single step of your service. This ensures consistency and better tracking.

+ 1. Adding Chemicals

Inside the "Step Chemicals" modal (click the **Chem** button), click + **Add Chemical** to add a new chemical entry for that step.

2. Auto-Save Workflow

There is no "Save" button to hunt for when adding new chemicals. Simply select a chemical from the dropdown, and it will **automatically save** to your job checklist. You can then refine the dilution ratio, tools, or application notes if needed.

🌟 3. Auto-Suggest (AI)

Don't want to browse the full inventory? Click **Auto-Suggest**. The system analyzes the name of the service step (like "Foam Bath" or "Wheel Clean") and recommends the best chemicals from your shelf.

- **Fallback:** If no specific match is found, the system will show your **Full Inventory** as a convenient fallback list.

4. Overrides & Prep

For each chemical assigned, you can override:

- **Dilution:** Specify a custom ratio for this specific job.
- **Tools:** Pick a specific tool (Pressure Washer, Foam Cannon, etc.).
- **Application:** Add short notes for your technicians.
- **Include in Prep:** Toggle this to include the chemical in the "Prep Summary" PDF for quick gathering.

CHAPTER 62 • CHEMICALS

CHEMICAL INVENTORY MODAL

CHAPTER SCOPE & OBJECTIVE:

Learn how to manage multiple bottle sizes, costs, and details for a single chemical.

The Unified Inventory Modal: A centralized place to manage all properties of a single detailing chemical, including varying bottle sizes and costs.

+ 1. Adding a New Bottle Size

Scroll down to the **Stock & Pricing** section and click the dashed "Add Another Bottle Size" button. Enter the specific size (e.g., 1 Gallon), cost, stock, and threshold.

2. Modifying an Existing Record

Open the chemical card by clicking the **Edit (pencil)** icon. Change details in the **Basic Information** grid or update your **Current Stock** directly in the variant row.

3. Deleting a Bottle Size vs. Entire Chemical

- **Delete a Size:** Click the red "X" next to a specific size row to remove just that variant. This leaves the main chemical intact.
- **Delete Entire Chemical:** Click the main **Delete** button at the bottom right of the modal to completely erase the product and all its sizes.

4. AI Templates & Dilution Ratios

Select a template from the top dropdown to automatically populate safety warnings, descriptions, and recommended dilution ratios from the Library.

CHAPTER 63 • CHEMICALS

CADDY WORKSHEET

CHAPTER SCOPE & OBJECTIVE:

A standalone cloud-synced & offline-capable printable worksheet for managing detailing caddies.

The **Caddy Worksheet** is a specialized, cloud-synced module designed for viewing, editing, and printing reference guides for your detailing caddies.

 1. Standalone & Supabase Cloud Sync

This tool operates independently of your main inventory database while automatically persisting all edits, custom caddies, and accordion collapsed/expanded states directly to Supabase cloud storage (Row ID 1).

 2. Accordions, Double-Arrow Toggle & Auto-Scroll

Each caddy is housed inside an interactive accordion section. Use the double-arrow icon button in the header ('ChevronsDown'/'ChevronsUp') to quickly Expand All or Collapse All caddies. Expanding any caddy automatically scrolls its header to the top of the viewport to maximize visible slots.

 3. Per-Caddy & Batch PDF Printing

Click the dedicated **Print Caddy** button located right next to any caddy's header to generate a print/PDF snapshot for that caddy alone. Alternatively, select individual caddy checkboxes and click **Print Selected** to batch export multiple caddies. The print engine automatically fits each caddy cleanly onto a single printed page.

 4. Ratio Field & E1/E2 Extra Slots

Chemical caddies (Interior, Exterior, Specialty) feature a dedicated **Ratio** field optimized to display dilution codes (like RTU, 10:1, 4:1) clearly on desktop and mobile screens. Extra slots 9 & 10 display neatly as **E1** and **E2**.

 5. Custom Caddies & Full-Width Aligned Description

For any custom caddies (clay bars, pads, brushes, left/right caddy sides), each slot includes a full-width **Description** line positioned directly beneath the item name and aligned with the Item Name input field.

 6. Caddy Settings & Worksheet Reset

Click the **Caddy Settings** (gear icon) button in the header to customize slot visibility (toggle 8 vs 10 slots) or perform a **Reset to Saved Defaults** to discard unsaved client changes and reload saved data from Supabase.

CHAPTER 64 • CHEMICALS

CHEMICAL LABEL MAKER

CHAPTER SCOPE & OBJECTIVE:

Professional label creation with Quick Choice accordions, AI assistance, and multi-chemical sticker sheets.

Overview: The Chemical Label Maker is a high-precision design tool for creating professional bottle labels and sticker sheets.

 Quick Dilution Choice (Top Accordion):

- **Auto-Sync:** This section pulls live data from the Dilution Reference Chart.
- **One-Click Scenarios:** Instantly select from **Standard (Waves)**, **Heavy Duty (Flame)**, or **Maintenance (Sparkle)** ratios. Choosing one automatically updates your label text and ratio.
- **Product Reference:** Displays the current chemical image and brand for quick verification before you start designing.

 Advanced Design Settings (Bottom Accordion):

- **Deep Customization:** Access all expert controls for Product Overrides, Brand/Series text, Usage Instructions, and Safety Alerts.
- **Toggle Controls:** Every element on the label can be toggled on/off to create the perfect minimal or data-rich layout.

 Multi-Chemical Sticker Sheets (Free Form):

- **10-Label Layout:** Designed for 2" x 4" sticker sheets (2x5 grid).
- **Multi-Chemical Support:** You can now choose DIFFERENT chemicals for each slot on a single sheet. Click any slot to "Use Current Design", "Pick Saved Design", or "Clear Slot".
- **Bulk Tools:** Use "FILL ENTIRE SHEET" to instantly copy your current design to all 10 slots, or "CLEAR SHEET" to start fresh.

 AI Auto-Fix & Intelligence:

- **Auto-Fix:** Click "AI FIX" to condense long descriptions and pull precise instructions from the chemical library.
- **Bold Mode:** Increases font weight across the entire label for maximum visibility on shop-floor printers.

 Saving & PDF:

- **Print Grid:** Select multiple saved templates in the sidebar to print a batch of labels (2x2 grid) at once.
- **Save PDF:** Generates a high-quality download for your records or professional printing.

CHAPTER 65 • CHEMICALS

CHEMICAL WORKFLOW

CHAPTER SCOPE & OBJECTIVE:

Master the full lifecycle of chemical management—from library selection to bottle labeling and job tracking.

The Professional Chemical Workflow: This guide explains how to properly manage chemicals across the entire system.

 Step 1: The Chemical Library

The process begins in the **Chemical Cards** page. Here, you can search our entire arsenal of products. Each card contains vital data about:

- **Safety & Hazards:** Proper protection and warnings.
- **Mix Ratios:** Task-specific dilution rates for different surfaces.
- **Gallery:** Real-world photos of the product and its results.

 Step 2: Designing the Label

Once a chemical is selected, use the **Bottle Label Maker** to create custom identifiers for your workspace:

- **AI Automation:** Use "AI FIX" to generate concise, professional descriptions instantly.
- **Task-Specific Ratios:** The label maker pulls the "Best Ratio" automatically based on your task (Interior, Exterior, etc.).
- **Verification:** Use the real-time preview to ensure all safety warnings and primary dilution ratios are clearly visible.

 Step 3: Inventory & Labels

After printing your high-contrast label, ensuring it matches the physical stock:

- **Inventory Updates:** Log restocks or bulk adjustments in the Inventory Control section.
- **Saved Templates:** Save your custom label designs to quickly reprint them when bottles are refilled or replaced.

 Step 5: The Interactive Reference Chart

The process concludes with full shop-floor visibility via the **Dilution Ref Chart** button:

- **Interactive Editing:** Admins can now adjust ratios directly within the chart modal.
- **Accidental Edit Protection:** A safety confirmation dialog prevents unwanted changes while scrolling on mobile.
- **Brand-First Sorting:** Organizes the entire shop list by brand alphabetically for rapid identification.
- **Color-Coded Precision:** Oz-size text (16/24/32) matches the shop-standard colored legend.

 **Why this matters:** Consistent labeling and high-visibility reference charts prevent cross-contamination, ensure surface safety, and maintain a professional laboratory-grade presentation for clients.

CHAPTER 66 • MENU

INVENTORY AUDIT CHECKLIST (IAC)

CHAPTER SCOPE & OBJECTIVE:

Perform systematic physical counts of all shop inventory.

Overview: The master workflow for verifying physical stock against digital records.

- **Count Modes:** Toggle between Quick (Gallons) and Detailed (Ounces) counting.
- **Accuracy:** Helps identify shrinkage, over-usage, and ordering needs.

CHAPTER 67 • MENU

MATERIALS & EQUIPMENT USAGE LOG

CHAPTER SCOPE & OBJECTIVE:

Track standalone and job-specific consumption of shop resources.

Overview: Record exact amounts of chemicals, supplies, and tools used.

- **Standalone:** Log usage for personal projects or shop maintenance without a job tie.
- **History:** Review past entries to spot usage trends and calculate exact consumption costs.

CHAPTER 68 • CHEMICALS

MATERIALS & EQUIPMENT USAGE REPORT LOG

CHAPTER SCOPE & OBJECTIVE:

Learn how to accurately log chemical usage, track supplies, and record equipment maintenance for job reports.

The Usage Report Log: This modal allows you to precisely record everything you used or checked during a specific detailing job.

 1. Navigation Tabs

The top of the modal features buttons to switch between **Exterior Chemicals**, **Interior Chemicals**, **Supplies**, **Tools**, and **Equipment Maintenance**. Clicking these instantly filters the inventory list to help you find what you need fast.

 2. Search & Sort

- **Search Bar:** Type any name or brand to instantly filter the active tab.
- **Sort Dropdown:** Quickly organize items A-Z, show Low Stock items first, or group by Brand.

 3. Granular Chemical Logging (1/8 oz)

When you log a chemical, it drops into the "Logged Job Usage Items" section at the bottom. Use the **+/-** buttons to quickly adjust the amount used in highly precise **1/8 oz increments** (0.125, 0.25, 0.375, etc.). Based on the dilution ratio, the system automatically calculates exactly how much pure concentrate was deducted from the bottle.

 4. Equipment Maintenance Tracking

Switch to the Equipment Maintenance tab to record critical rig details for the job:

- **Generator Log:** Record Gas Tank Levels (Full, 3/4, etc.), Last Fill-up Dates, Last Oil Change, and Air Filter changes.
- **Other Rig Equipment:** Keep condition notes for your Pressure Washer, Compressors, and Hoses (e.g. "Hose has a small leak, needs replacing soon").

 5. Safe Saving (Reporting Only)

Clicking **Save Materials Usage Log** saves all this data directly to the customer's job report. **Crucial Note:** This modal is for reporting purposes only. It does **NOT** permanently deduct from your Master IAC (Inventory Audit Checklist) stock levels. It only logs what was used for this specific service.

CHAPTER 69 • MENU

VENDOR & SUPPLIER MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Manage relationships and restock links for your suppliers.

Overview: Keep your supply lines moving with organized vendor data.

- **Directory:** List of favorite vendors for chemicals, towels, and tools.
- **Restock:** Quick-links to order pages for high-consumption products.

PART 5 OF 8

STAFF, TRAINING, CERTIFICATION & COMMUNICATIONS

Workforce Development, Examinations & Internal Channels

New technician onboarding, standard operating procedures (SOPs), knowledge library, certification examinations, team dispatch chat, and high-fidelity training simulations.

Contains 12 structured operational chapters.

CHAPTER 70 • MENU

EMPLOYEE TRAINING & ACCESS HUB

CHAPTER SCOPE & OBJECTIVE:

A curated view for staff to manage their work and training.

Overview: The primary interface for technicians and mobile detailers.

- **Work Queue:** See assigned jobs and service checklists.
- **Learning:** Professional detailing masterclasses and certification progress.

CHAPTER 71 • MENU

TECHNICIAN CERTIFICATION PROGRAM

CHAPTER SCOPE & OBJECTIVE:

Structured learning paths for professional detailing mastery.

Overview: Elevate your team with standardized service excellence.

- **Exams:** Test knowledge on chemicals, tools, and SOPs.
- **Badges:** Earn certifications for paint correction, coatings, and more.

CHAPTER 72 • MENU

DETAILING LEARNING LIBRARY

CHAPTER SCOPE & OBJECTIVE:

A vast repository of detailing knowledge and technique guides.

Overview: The master guide for everything from basic washes to ceramic coatings.

- **SOPs:** Step-by-step Standard Operating Procedures for all services.
- **Equipment:** Guides on how to use polishers, steamers, and extractors.

CHAPTER 73 • MENU

NEW EMPLOYEE ORIENTATION

CHAPTER SCOPE & OBJECTIVE:

Introduction to the Prime method and company culture.

Overview: Welcome new staff to the team with professional onboarding.

- **System Training:** How to use the app for time tracking and job checklists.
- **Standards:** Review safety, dress code, and customer service expectations.

CHAPTER 74 • MENU

STAFF PROFILES & COMPENSATION

CHAPTER SCOPE & OBJECTIVE:

Manage employee records, pay rates, and performance.

Overview: The administrative hub for your detailing team.

- **Pay Structure:** Set flat rates, hourly wages, or commission by job.
- **Performance:** Track job history and customer feedback per employee.

CHAPTER 75 • MENU

COMPANY EMPLOYEES

CHAPTER SCOPE & OBJECTIVE:

Comprehensive HR management for employee details, payroll, and roles.

Overview: Detailed employee management beyond basic user creation.

Employee Details:

- Full contact information (address, emergency contacts)
- Role and position management
- Department assignments
- Hire date and employment status

Payroll Management:

- Pay rates and compensation
- Hours tracking
- Payment history
- Integration with Payroll page

Schedule & Availability:

- Work schedule preferences
- Time off requests
- Availability windows
- Integration with Staff Schedule

Performance & Notes:

- Performance reviews
- Manager notes
- Training completion
- Certification tracking

When to Use Company Employees:

- ✓ HR tasks and employee records
- ✓ Payroll and compensation
- ✓ Detailed contact information
- ✓ Performance management

When to Use Users & Roles Instead:

- ✓ Quick employee creation
- ✓ Simple deletion
- ✓ Overview stats

Features:

Create employees with comprehensive details

Edit all employee information

Impersonate employees to test role-based views

Delete employees with confirmations

Search and filter employee list

Integration:

- Links to Payroll for payment processing
- Links to Staff Schedule for shift management
- Links to Tasks for work assignments
- Links to Training for certification tracking

CHAPTER 76 • MENU

SECURE TEAM COMMUNICATION

CHAPTER SCOPE & OBJECTIVE:

Real-time messaging for shop coordination.

Overview: Fast communication between the shop and field detailers.

- **Sync:** Share job updates and coordinate supplies without phone calls.
- **Security:** Private, internal-only communication for staff safety.

CHAPTER 77 • DASHBOARD

CHEAT SHEET & EXAM CONTROL

CHAPTER SCOPE & OBJECTIVE:

Compact pill links to Exam Admin and Exam Page.

Open Cheat Sheet to generate and archive the handbook reference PDF.

Exam Admin lets you manage questions and generate cheat sheet PDFs.

Exam Page is the employee test; completion unlocks Certificates.

Certificates page saves the training certificate PDFs to File Manager.

CHAPTER 78 • MENU

TRAINING & EXAMS

CHAPTER SCOPE & OBJECTIVE:

Provide courses, exams, and orientation materials for employees.

Orientation modal outlines company overview, policies, and getting started guides.

Training Manual and Exam flows reinforce best practices and certify employees.

Certificates can be generated and archived in File Manager.

CHAPTER 79 • SYSTEM

GUIDED TRAINING & DEMO MODE

CHAPTER SCOPE & OBJECTIVE:

Learn how to use the interactive demo for staff training and feature exploration.

Welcome to Training Mode: The Interactive Demo is a high-fidelity simulation designed for staff onboarding and feature exploration without risking real business data.

1. Total Data Isolation

When Demo Mode is active (indicated by the amber banner), the system is strictly **READ-ONLY**. It disconnects from your production database and serves professional **Mock Data** instead.

- **Financials:** Explore Accounting, Payroll, and Budgets with simulated records.
- **Inventory:** Practice with a full library of chemicals and materials.
- **Estimates:** Generate sample quotes to master the sales workflow.

2. Interactive Walkthroughs

Look for the "Guided Tour" icons. These provide step-by-step overlays that explain advanced features like the **Dilution Calculator** and **Smart Sync** in real-time.

3. Security & Admin Simulation

In Demo Mode, users are granted "Simulated Admin" visibility. This allows employees to see how management tools work, enabling them to understand the "big picture" of the business operations while maintaining strict zero-access to real records.

4. Sharing on Social Media (Facebook, Instagram, etc.)

You can use this app as a powerful marketing and demonstration tool on your social media pages by sharing the direct **Demo Link**:

- **The Link:** Share ``https://your-app-domain.com/demo`` in your Facebook posts or Instagram bio.
- **Automatic Activation:** Anyone who clicks this link will automatically enter **Demo Mode**. They can explore all the administrative features, catalogs, and calculators without needing to create an account or sign in.
- **Safe Exploration:** Visitors can "click everything" and see how your business operates professionally, but they can never view or change your real customer records or financial data.

5. Live URL & Security Kill-Switch

You have total control over your public footprint. In **System Settings**, administrators can instantly disable the ``/demo`` URL if security concerns arise.

- **Kill-Switch:** Flip the "Live DEMO URL" toggle to OFFLINE to revoke all public access immediately.
- **Custom Reasons:** If disabled, you can select a reason (e.g., Maintenance, Security) which will be displayed to any visitors attempting to access the link.
- **Admin Preview:** Even when the public URL is disabled, you can still use **Admin Preview Mode** to safely explore features or train staff internally.

💡 **How to Exit:** To return to the real site, simply click the **"Exit Training Session"** button in the orange banner, or navigate back to the main homepage (``/``). The system will automatically clear your session and restore full live functionality.

⚠ **Persistence & Modifications:** While browsing, you can click any menu item and the demo session will remain active. However, any "actions" you take (like hitting Save or Delete) are strictly blocked to protect the production database. **Chemical Cards** and **Global Inventory** are protected by a double-layer security guard that prevents any writes while in simulation.

- **Audit Trail:** Real-world inventory items now include **"Last Updated"** timestamps to help you track when data was last modified by your team.

CHAPTER 80 • CHEMICALS

UNDERSTANDING LINKS VS. CARDS

CHAPTER SCOPE & OBJECTIVE:

Why some inventory items have a "Link" button while others have "Card" and "Label" buttons.

The Difference Between Inventory and the Library:

Your system has two distinct halves that work together:

1. **The Inventory (Stock):** This tracks how many bottles you have, how much they cost, and when you need to reorder.
2. **The Chemicals Library (Knowledge Base):** This is the encyclopedia. It stores the safety data, AI-generated descriptions, dilution ratios, and instructions for how to use the chemical.

 The "Link" Button (Yellow)

If you see a yellow **Link** button next to an inventory item, it means the item exists on your shelf (Inventory), but it is **NOT** connected to an encyclopedia entry (Library).

- Click **Link** to search the Library and connect it to an existing Card, or easily create a brand new Card for it.

 The "Card" & "Label" Buttons (Blue/Purple)

Once an item is successfully linked, the Link button vanishes and is replaced by **Card** and **Label** buttons.

- **Card:** Opens the full encyclopedia entry containing instructions, safety data, and technical info.
- **Label:** Allows you to instantly generate and print OSHA-compliant secondary bottle labels complete with QR codes.

 **Pro Tip:** To get the most out of your system (especially printing labels and viewing dilution charts), you want to make sure every item in your inventory is Linked!

CHAPTER 81 • CHEMICALS

RICK'S TIPS & ADMIN CONTROLS

CHAPTER SCOPE & OBJECTIVE:

Manage professional advice, inventory synchronization, and administrative security for service packages.

Rick's Expertise (v3): This specialized system maps professional chemical recommendations to your live business packages, now with upgraded stability, role-based security, and live inventory tracking.

1. Admin-Only Access (Permissions)

To protect your professional data integrity, editing is restricted by role:

- **Admins:** Full access to edit guides, change chemical mappings, and use management tools.
- **Employees:** Read-only access. They can view advice and print charts but cannot modify any data.

2. Sync Inventory (Live Refresh)

The 'Sync Inventory' button (found in the header) is your **Live Refresh** tool. It forces the modal to re-scan your entire chemical cabinet and update the list and counts instantly. Use this if you just added new chemicals in the background.

3. Reset to Defaults

Admins can use the 'Reset Defaults' utility to instantly restore Rick's factory-standard professional advice and chemical mappings. *Note: This will overwrite any custom notes you have written.*

4. Dual-Style Export Engine

Choose how to document your guides:

- **Print (Doc Style):** Clean black-and-white layout for physical paper use.
- **Save (PDF Style):** Premium colorful layout for digital viewing on tablets.

PART 6 OF 8

BUSINESS INTELLIGENCE, ANALYTICS & REPORTS

Data Architecture, Performance Tracking & Executive Summaries

Executive dashboards, temporal date filtering scans, logic grouping engines, employee productivity KPIs, invoice audit reporting, and business valuation modeling.

Contains 15 structured operational chapters.

CHAPTER 82 • MENU

BUSINESS ANALYTICS & INSIGHTS

CHAPTER SCOPE & OBJECTIVE:

Analyze booking trends, revenue growth, and service popularity.

Data-Driven Decisions: The Analytics dashboard provides a bird's-eye view of your business performance.

 1. Booking Volume

Track how many jobs you are booking per week/month. Identify your busiest days to optimize staffing.

 2. Revenue Tracking

Visualize your gross revenue over time. Compare current performance against previous months or years.

 3. Service Popularity

See which packages (e.g., Prime Elite vs. Essential) are selling the most. Use this to refine your marketing focus.

 4. Customer Retention

Monitor how many customers are returning for multiple services. This is the key to long-term profitability.

CHAPTER 83 • MENU

ADMIN DASHBOARD

CHAPTER SCOPE & OBJECTIVE:

Central control hub for alerts, jobs, KPIs, and quick admin actions.

Overview cards show unpaid invoices, inventory alerts, task updates, and file changes.

Quick links provide access to Customer profiles, Invoicing, Accounting, Payroll, Inventory, File Manager, Reports, and more.

Scenario Builder: Quick access shortcut in the top right to create custom pricing quotes.

Menu Visibility Controls allow hiding or showing dashboard tiles in the sidebar and menus.

User Administration provides full user management: create, update, impersonate, and delete employees.

Employee Management modal focuses on employee operations with search and edit capabilities.

Web Administration integrates vehicle types, FAQs, contact info, and About sections management.

Phone Assistant: Direct access to branded scenario scripts and consistent package inclusions.

CHAPTER 84 • MENU

BOOKING CALENDAR ANALYTICS

CHAPTER SCOPE & OBJECTIVE:

View business performance, customer trends, and booking stats.

Access Analytics view from the Bookings page or sidebar.

Use date filters to analyze specific periods.

View charts for revenue, booking counts, and customer acquisition.

CRM Table: Filter and manage customer bookings directly.

CHAPTER 85 • MENU

REPORTS & ANALYTICS HUB

CHAPTER SCOPE & OBJECTIVE:

Generate and review business performance reports and data exports.

Overview: The central repository for all shop data and business intelligence.

- **Filters:** Use the global date range and category filters to refine your data.
- **Exports:** Professional PDF and CSV exports are available for all report types.
- **Layout:** Switch between summary charts and detailed data tables using the tabs.

CHAPTER 86 • MENU

REPORTS CENTER MASTERCLASS

CHAPTER SCOPE & OBJECTIVE:

Master the entire Reports Center, including Accounting, Inventory, Employees, and performance metrics.

Overview: The Reports Center is your business intelligence hub. It aggregates live data from every corner of the shop to give you a 360-degree view of your operations.

 1. Accounting & Financial Ledger

- **Total Revenue:** Calculated from all **Paid Invoices**. Note that "Pending" invoices do not count toward revenue until payment is logged.
- **Net Profit:** Revenue minus Expenses (Rent, Chemicals, Equipment).
- **Filter Logic:** Accounting reports respect the top-level Date Filter (Today, This Week, etc.).

 2. Inventory & Valuation

- **Real-Time Assets:** Shows the current value of Chemicals, Materials, and Tools on your shelves.
- **Status Alerts:** Highlights items that are below their "Low Threshold" so you know what to reorder.

 3. Employee Performance

- **Jobs Analysis:** Tracks how many jobs each technician is assigned to. If an employee is NOT appearing, ensure they have at least one job assigned to them or that their profile is correctly set to "Employee" or "Admin".
- **Paul Troubleshooting:** If a specific employee like Paul is missing, check the **Staff Management** page to verify their account role and email are correctly configured.

 4. Estimates & Quotes

- **Sales Pipeline:** Tracks all sent and converted quotes. This help you see your "Closing Rate" and identifying which services are generating the most interest.

 5. Invoices & Add-ons

- **Paid vs. Unpaid:** A clear breakdown of your accounts receivable.
- **Add-on Performance:** See which "Extras" (like Pet Hair or Clay Bar) are most popular and profitable.

 6. Services Performance (NEW)

- **Package Analysis:** See which main packages (Essential, Elite, etc.) are your top sellers. This helps you focus your marketing on your most popular offerings.

CHAPTER 87 • MENU

TEMPORAL SCAN (DATE FILTERING)

CHAPTER SCOPE & OBJECTIVE:

Learn how to use the date filters to analyze specific time periods.

Time-Based Analysis: Every report in the center can be filtered by specific time windows.

 Available Filters

- **Daily (Today):** Real-time look at today's appointments and revenue.
- **Weekly / Monthly:** Perfect for tracking mid-term goals and payroll cycles.
- **All Time:** A comprehensive view of your shop's entire history since Day 1.
- **Custom Range:** Select any specific start and end date for precise audits.

 **Pro Tip:** Use the "Custom Range" for tax preparation or when auditing a specific holiday rush.

CHAPTER 88 • MENU

INTELLIGENT LOGIC GROUPING

CHAPTER SCOPE & OBJECTIVE:

How the system categorizes data for cleaner accounting.

Smart Categorization: Logic Grouping automatically sorts your financial data into standardized buckets.

 The Logic

- **Supplies:** Consumables like chemicals and towels.
- **Equipment:** Long-term assets like polishers and extractors.
- **Payroll:** Technician commissions and hourly pay.

 **Tax Ready:** This grouping ensures your end-of-year tax export is already categorized for your accountant.

CHAPTER 89 • MENU

CUSTOMER DATA REPORTS

CHAPTER SCOPE & OBJECTIVE:

Analyze customer acquisition, retention, and lifetime value.

Overview: Detailed insights into your client base and their booking patterns.

- **Acquisition:** Track how new customers found your shop (e.g., SEO vs. Word of Mouth).
- **Retention:** Identify top-tier "VIP" clients and those due for follow-up.
- **History:** Export full customer lists with vehicle and booking counts.

CHAPTER 90 • MENU

INVOICE & PAYMENT AUDITS

CHAPTER SCOPE & OBJECTIVE:

Detailed records of all financial transactions and balances.

Overview: The master ledger for your detailing revenue.

- **Transactions:** Review paid, pending, and overdue invoices.
- **Methods:** Breakdown of revenue by payment type (Cash, Card, Check).
- **Aging:** Identify customers with outstanding balances for follow-up.

CHAPTER 91 • MENU

INVENTORY VALUE REPORTS

CHAPTER SCOPE & OBJECTIVE:

Track the liquid value and consumption of your shop supplies.

Overview: Physical asset tracking for chemicals, towels, and equipment.

- **Total Value:** Real-time calculation of the total financial value of your shelf stock.
- **Consumption:** Analyze which products are used most frequently in the shop.
- **Low Stock:** Visual highlights for items reaching their reorder threshold.

CHAPTER 92 • MENU

TECHNICIAN PERFORMANCE ANALYTICS

CHAPTER SCOPE & OBJECTIVE:

Individual stats for employee efficiency and revenue generation.

Overview: Monitor team performance and individual technician success.

- **Efficiency:** Real-time tracking of "Time on Job" vs. "Estimated Time."
- **Revenue:** Monthly revenue breakdown generated by each specific employee.
- **Commissions:** Audit payroll payouts linked directly to job performance.

CHAPTER 93 • MENU

ESTIMATES & QUOTE PERFORMANCE

CHAPTER SCOPE & OBJECTIVE:

Analyze your sales pipeline and quote conversion rates.

Overview: Track how many quotes are being turned into paid bookings.

- **Conversion Rate:** Percentage of sent estimates that were accepted and booked.
- **Pending Value:** Total potential revenue currently sitting in open estimates.
- **Declined:** Analyze why quotes were rejected to improve your sales pitch.

CHAPTER 94 • MENU

FULL BUSINESS ACCOUNTING REPORT

CHAPTER SCOPE & OBJECTIVE:

Complete financial overview including P&L and Net Profit.

Overview: The "Big Picture" view of your shop's financial health.

- **P&L:** High-level Profit and Loss summary across any date range.
- **Margins:** Real-time analysis of net profit margin after all deductions.
- **Reconciliation:** Cross-check invoice revenue against recorded business expenses.

CHAPTER 95

SMART MISSION LOGIC INSPECTOR

CHAPTER SCOPE & OBJECTIVE:

Transparency tool that reveals exactly why a customer was flagged for follow-up.

The "Logic Inspector" Button

Located at the top right of your Smart Mission Workflow in the Retention Hub. This button toggles the **Admin Transparency Log**.

🎯 What It Does

Instead of blindly trusting the CRM to assign follow-up missions, the Logic Inspector shows you the exact mathematical criteria the system used to flag a customer.

💡 Example Scenarios

- **Reactivation:** "Triggered because customer is extremely overdue by 45 days (> 30 day threshold)."
- **Action Required:** "Triggered because customer is moderately overdue by 12 days (> 10 day threshold)."
- **Lead Recovery:** "Triggered because quote was sent 6 days ago but remains unaccepted (> 5 day threshold)."

⚙️ Why It Matters

This ensures complete transparency over the automated retention engine. If you ever wonder "Why am I being told to call John Doe?", simply click the Logic Inspector to see the underlying data.

CHAPTER 96 • MENU

JOBS COMPLETED

CHAPTER SCOPE & OBJECTIVE:

View jobs completed with revenue and status details.

Review finished jobs, dates, and totals to reconcile with accounting.

Dismiss related alerts once items are reviewed and reconciled.

PART 7 OF 8

WEBSITE CONTENT, MARKETING & PUBLIC PORTALS

Client Touchpoints, Digital Marketing & Online Experience

Customer-facing website administration, content block management, blog publishing, promotional discount systems, testimonial curation, and seasonal operation modes.

Contains 20 structured operational chapters.

CHAPTER 97 • MENU

WEBSITE ADMINISTRATION

CHAPTER SCOPE & OBJECTIVE:

Manage your public-facing detailing website and bookings.

Overview: Complete control over your online shop presence.

- **Content Management:** Update service descriptions, pricing, and banners.
- **SEO & Settings:** Control metadata and Google Search performance.

CHAPTER 98 • MENU

WEBSITE

CHAPTER SCOPE & OBJECTIVE:

Open the public site to view packages, add-ons, and tools.

Prime Tiers: The public site features the standardized Prime Essential and Prime Elite tiers.

Avg. Time Display: Customers can see the "Average Time" for each package in the "Learn More" modals.

Booking Integration: The search and selection process in the Book Now flow is fully synchronized with admin pricing.

Use this entry to quickly access the public pricing and services pages.

CHAPTER 99 • MENU

WEBSITE CONTENT MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Master the visibility and content of your Home, About, and Contact pages.

Testimonials (Customer Reviews): Manage your wall of social proof. In the "Testimonials Management" section, you can add new reviews, edit existing ones, or delete them. These sync across both Home and About pages.

 **Fallback System:** If you haven't added any custom testimonials yet, the website will automatically display a curated set of "Verified Client" reviews to ensure your site never looks empty when the section is enabled.

 **FAQs:** Add or edit common customer questions to reduce inquiry fatigue. FAQs are grouped and searchable on the live site.

 **About Content:** The "About Page Content Control" lets you rewrite your hero titles, Who We Are bio, and restoration story. The "Legacy Sections" table allows you to add additional rows of custom information at the bottom of the page.

 **Visibility Toggles:** Each section (Testimonials, FAQs, Booking Buttons) has its own "Visible/Hidden" switch. This allows you to build out your content in private and only show it when it is ready for public eyes.

CHAPTER 100 • MENU

HOME PAGE CONTENT CONTROL

CHAPTER SCOPE & OBJECTIVE:

Manage the hero section, branding, SEO text, and process steps on your landing page.

The Face of Your Brand: The Home page is usually the first thing a customer sees. Use these controls to ensure your branding is pitch-perfect.

 1. Hero & Branding

Customize the main headline and italicized subtitle that greets visitors. Use high-impact keywords like "Premium" and "Precision."

 2. SEO & Education

Edit the "Why Detailing Matters" section. This is critical for search engine optimization and teaching customers the value of professional detailing over standard car washes.

 3. Precision Process

Detail your unique 3-step workflow (e.g., Booking, Evaluation, The Detail). This sets professional expectations before the keys are even handed over.

 4. Testimonials Toggle

Decide whether customer reviews should appear on the home page. Highly recommended once you have at least 3-4 positive entries.

CHAPTER 101 • MENU

ABOUT PAGE CONTENT CONTROL

CHAPTER SCOPE & OBJECTIVE:

Rewrite your company story, core benefits, and detailed service philosophies.

Transparency & Trust: The About page build connection with your clients. Share your passion and specialized techniques here.

 1. About Hero

Set the tone with a dedicated award badge (e.g., "Premium Craftsmanship") and a strong mission statement title.

 2. Core Benefits

Define the 3 pillars of your service—such as Paint Preservation, Value Retention, and Internal Health. These highlight WHY a client should choose you.

 3. Company Bio

Use the "Who We Are" section to provide a personalized biography. Talk about your history, your standards, and your commitment to the craft.

 4. Specialized Care

Manage the detailed text for your "Interior Refresh" and "Exterior Protection" strategies. Explain the science behind your work.

CHAPTER 102 • MENU

FAQS MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Add, edit, or remove frequently asked questions to reduce customer inquiry fatigue.

Efficiency Through Information: A robust FAQ section answers common objections before the customer even picks up the phone.

 Transparency & Policy

Use the FAQ section to address sensitive topics like pricing variability, service duration, and surface safety with chemical use.

 Organization

FAQs appear in a searchable accordion format on the public site, keeping the page clean while providing deep information on demand.

 Instant Updates

Changes made in this section are synced instantly to the live FAQ page. Keep your policies updated as your business grows.

CHAPTER 103 • MENU

CONTACT CONTROL

CHAPTER SCOPE & OBJECTIVE:

Manage your global business contact details, hours, and location.

Connecting with Clients: Ensure your customers always have the most accurate pathways to reach you.

 Profile Sync

Update your business phone number, email, and physical address in one place. These details propagate to the Contact page and various site headers.

 Service Hours

Define your operating schedule. This text appears on the Contact page and serves as the official reference for customer expectations.

 Location Details

If you have a fixed shop, ensure the address is precise for navigation. If you are mobile, use this space to mention your service area coverage.

CHAPTER 104 • MENU

CONTACT FORM: PHOTO ATTACHMENTS

CHAPTER SCOPE & OBJECTIVE:

Learn how users can attach photos to inquiries and how you receive them.

Client Visibility: The Public Contact page now includes a multi-file upload system, allowing prospects to show you exactly what they need—before you even speak.

 1. How Customers Upload

Customers can select multiple photos from their phone or computer using the "Attach Photos" button. The system supports JPG, PNG, and WebP formats.

 2. Supabase Storage Integration

Photos are instantly uploaded to a secure "customer_media" bucket in your cloud storage. This prevents slow form submissions and ensures images are safe even if the customer loses connection.

 3. Receiving the Photos

When a new inquiry is submitted:

- **Direct Links:** Your notification email (Rick.PrimeAutoDetail@gmail.com) will automatically include high-resolution, clickable links to every photo attached.
- **Prospect History:** All photo links are permanently saved in the "Notes" section of the Prospect profile for that client.

 4. Identification

Photos are automatically named with a unique timestamp to prevent overwriting and help you identify "Before" condition during the quoting phase.

CHAPTER 105 • MENU

FOOTER CONTENT CONTROL

CHAPTER SCOPE & OBJECTIVE:

Customize the persistent branding and legal text at the bottom of every page.

The Foundation of Your Site: The footer provides professional closure to every page and hosts essential links.

 Marquee Slogan

Edit the scrolling or static catchphrase that defines your brand at the bottom of the page (e.g., "Precision. Protection. Perfection.").

 Social Branding

Link your official Facebook page directly. This ensures the Facebook icon in the footer takes users to your active social community.

 Legal & Branding

Ensure your official brand name and copyright year are professionally displayed to reinforce business legitimacy.

CHAPTER 106 • MENU

TESTIMONIALS MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Manage customer social proof and review visibility across your website.

Social Proof & Trust: Testimonials (Reviews) are one of the most powerful tools for converting visitors into customers. Use this section to manage your wall of "Social Proof."

● Global Visibility Toggle

The "Testimonials" card at the top of the dashboard acts as a master switch. When "ACTIVE", reviews will appear on the Home and About pages. When "INACTIVE", the entire section is hidden from the public.

Adding & Editing Content

Manage specific reviews within the **Home Page Content Control** section. You can add new client quotes, edit existing names, or delete entries as needed.

Auto-Fallback System

If you enable testimonials but haven't added any custom quotes yet, the system will automatically display a curated set of "Verified Client" reviews. This ensures your site always looks established and professional.

CHAPTER 107 • MENU

DETAIERS BLOG MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Publish SEO-optimized content to your detailing website.

Overview: Content marketing for detailing business growth.

- **Articles:** Write about ceramic coatings, maintenance tips, and shop news.
- **SEO:** Drive organic traffic to your booking page through helpful content.

CHAPTER 108 • MENU

ELITE STORY MASTER (REORDERING)

CHAPTER SCOPE & OBJECTIVE:

Master the sequence of your blog stories with the accordion-style reorder tool.

The Elite Story Master: This professional command center is designed to give you absolute control over how your stories appear to the public.

1. The Accordion Layout (Collapsible Rows)

To save space on mobile and provide a clean overview, every post is "Collapsed" by default. You will see the thumbnail, title, and current position.

- **How to Expand:** Simply click anywhere on the post row. It will slide open to reveal all the advanced management tools (AI Assistant, Social Media Blast, and Visibility Toggles).

2. Drag & Drop Reordering

You can change the order of your blog posts instantly.

- **The Grip Handle:** Look for the six vertical dots (::) on the far left of every row. Click and hold these dots to drag the post to a new position.
- **The Layout Badge:** While dragging, the system will update the position numbers in real-time.

3. Saving the Sequence

Moving items on the screen does NOT immediately update your live website. This is a safety feature.

- **Save Sequence:** Once you are happy with the new order, you MUST click the blue **"SAVE SEQUENCE"** button at the top. This locks the order into the cloud and updates your public blog.

4. Advanced Post Actions (Expanded View)

When a row is expanded, you can use these specialized tools:

- **AI Strategist (Sparkles):** Generate professional descriptions or analyze post performance.
- **Social Blast (Rocket):** Instantly share the story to your business social media pages.
- **Visibility (Globe/Lock):** Toggle between Public and Private status without deleting the post.
- **Activity History:** View a persistent audit log of every action taken on your blog.

CHAPTER 109 • MENU

PROMO CODES & MARKETING

CHAPTER SCOPE & OBJECTIVE:

Create and manage discount codes for marketing campaigns with canonical service-only discount math.

Overview: Drive bookings during slow periods with targeted promo codes and discount coupons.

- **Service-Only Discount Rule:** ALL discounts (percentages or fixed dollar amounts) apply strictly to **Detail Service Packages ONLY** (e.g. Prime Essential Full Detail).
- **Add-Ons at 100% Full Price:** Add-Ons (e.g., Pet Hair Removal, Engine Bay Cleaning, Leather Conditioning) are **NEVER discounted** and are added at 100% full price after discounting the base service package.
- **Calculation Formula:** Total = (Base Service Price - Discount Amount) + Add-Ons Total + Destination Fee.
- **Carolyn Person Example:** Base Detail Service \$327 less 10% coupon (\$33) = \$294, plus \$94 Pet Hair Removal (100% full price) = **\$388.00 Total** across Bookings, Estimates, Invoices, and PDFs.
- **Tracking & Rules:** Set expiration dates, active status, and track usage across all jobs.

CHAPTER 110 • MENU

DISCOUNT COUPONS

CHAPTER SCOPE & OBJECTIVE:

Define and manage coupons to promote services with service-only discount math.

Service-Only Discount Rule: ALL discount coupons (percentages or dollar amounts) apply strictly to **Detail Service Packages ONLY** (e.g. Prime Essential Full Detail).

Add-Ons at 100% Full Price: Add-Ons (e.g., Pet Hair Removal, Engine Bay Cleaning, Ceramic Trim Coat) are **NEVER discounted** and are always added at 100% full price after discounting the base service package.

Calculation Formula: Total = (Base Detail Service - Discount Amount) + Add-Ons (100% Full Price) + Destination Fee.

Carolyn Person Example: \$327 Prime Essential Full Detail less 10% coupon discount (\$33) = \$294.00, plus \$94.00 Pet Hair Removal (100% full price) = **\$388.00 Grand Total**.

Create coupons with codes, expirations, and discount values, track usage, and apply seamlessly across Bookings, Estimates, and Invoices.

CHAPTER 111 • MENU

BUSINESS CARD & QR GENERATOR

CHAPTER SCOPE & OBJECTIVE:

Professional print assets for local networking.

Overview: Create custom stickers and QR links for your business.

- **Social Proof:** Link direct to your Google reviews or booking portal.
- **Branding:** Export high-resolution assets for your local print shop.

CHAPTER 112 • MENU

VEHICLE TYPE MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Learn how to register new vehicle categories and set pricing multipliers.

The Multiplier Engine: Your business relies on scalable pricing based on vehicle size and complexity. The Vehicle Types section allows you to manage these tiers.

**Tier Definition**

- **Type Name:** The public-facing name of the vehicle category (e.g., "Full-Size SUV" or "Classic Motorcycle").
- **Pricing Multiplier:** This is the BASE amount added to a package for this vehicle type. For example, if a "Truck" has a \$150 multiplier, and a package costs \$200, the system calculates the starting price as \$350.
- **Protected Types:** Standard categories like Compact, Midsize, and Luxury are protected from accidental deletion to maintain core system stability.

How it Syncs: Changes to vehicle multipliers reflect immediately on the "Package Pricing" page and the live "Booking" portal calculations.

CHAPTER 113 • MENU

SERVICE DISCLAIMERS & DESCRIPTIONS

CHAPTER SCOPE & OBJECTIVE:

Master the legal and marketing text across your service catalog.

Education & Transparency: Detailing is a restorative process with specific boundaries. Use these controls to manage expectations.

**Global Disclaimer**

The text entered here appears at the bottom of the "Choose Your Service" page. Use it to outline standard policies such as: "Additional fees may apply for excessive pet hair, mold, or biohazards."

**Marketing Descriptions (Learn More)**

Each service package (e.g. "Prime Elite") has its own "Learn More" expanded view.

- **Marketing Copy:** Write a high-impact summary of what makes the package special.
- **Included Steps:** Use the checklist audit to toggle which physical steps (Wheel Cleaning, Clay Bar, etc.) are officially listed as "Included" for that specific package.

Pro Tip: Keep your disclaimer professional but firm. It is your first line of defense against scope-creep during a job.

CHAPTER 114 • MENU

BUSINESS LAUNCH MANAGER

CHAPTER SCOPE & OBJECTIVE:

Master the visibility and operational mode of your entire digital storefront.

Digital Presence Control: The Launch Manager is your mission control for how the public interacts with your business.

Website Operational Modes

Choose between standardized presets or create your own custom operational state:

- **Live Mode:** Standard operation. All booking buttons are active and banners are hidden.
- **Pre-Launch Mode:** Hides booking buttons and shows a professional "Coming Soon" banner. Perfect for building a prospect list before you officially open.
- **Winter Mode:** Specifically designed for seasonal closures. Disables bookings while keeping the inquiry portal open for spring scheduling.
- **Custom Mode:** Total control over banner text, subtext, and feature visibility.

Feature Toggles

For every mode, you can independently control:

- **Show Booking:** Toggle visibility of all "Book Now" buttons.
- **Contact Form:** Decide if customers can still send inquiries.
- **Banner Active:** Show or hide the top announcement banner.

 **Global Status Card:** The primary card at the top of the dashboard always syncs to your selected mode and provides a quick visual status of your site.

CHAPTER 115 • MENU

WINTER & SEASONAL CLOSURES

CHAPTER SCOPE & OBJECTIVE:

How to professionally pause operations during the off-season.

Managing the Off-Season: When the weather turns, you may need to stop mobile operations while keeping your pipeline full.

Activating Winter Mode

1. Navigate to the **Business Launch Manager**.
2. Select the **Winter Mode** preset.
3. Review the default "Closed for Winter" banner text.

Lead Preservation

Even when bookings are disabled, it is recommended to keep the **Contact Form** active. This allows you to collect "Prospects" who want to be first in line when you resume operations in the Spring.

Customer Experience

Professional banners explain WHY you are closed, which builds more trust than a site that simply has broken or hidden links.

CHAPTER 116 • MENU

BOOKING TEST MODE

CHAPTER SCOPE & OBJECTIVE:

Master the diagnostic testing environment for your public booking system.

Admin Test Environment: Booking Test Mode is a specialized state designed for administrators to verify the integrity and UX of the booking page without manually typing fake data.

 Active Mode (On)

- **Dynamic Visibility:** While active, a "Booking (Test)" link becomes visible in the main Navbar (for admins only).
- **Automated Pre-Fill:** When you visit the booking page in this mode, all inquiry fields—including Name, Email, Vehicle Details, and Date—are automatically populated with randomized test strings.
- **ADMIN Banner:** A prominent red "ADMIN TEST MODE ACTIVE" banner appears at the top of the booking page to prevent confusion with real entries.

 Standard Mode (Off)

- **Invisible:** All test-specific links and banners are removed.
- **Real Data Only:** The booking page returns to its standard state, requiring manual input from actual customers.

 **Pro Tip:** Use this mode whenever you update your service packages or pricing multipliers to ensure the calculation logic is still performing perfectly across all vehicle types.

PART 8 OF 8

SYSTEM ADMINISTRATION, SECURITY & MASTER SETTINGS

Security Policies, Role Access & Platform Utility

Multi-tenant role permissions, data sanitization, sandbox environments, media drive storage, secure internal journals, automated dispatch alerts, and global app settings.

Contains 21 structured operational chapters.

CHAPTER 117 • MENU

APPLICATION MASTER SETTINGS

CHAPTER SCOPE & OBJECTIVE:

Configure core business logic and security features.

Overview: The "Control Room" for the entire Prime app suite.

- **Security:** Enable Demo modes, bypass routing, and manage auth tokens.
- **Modules:** Toggle specific sections of the app (e.g., Inventory, CRM).

CHAPTER 118 • MENU

SETTINGS

CHAPTER SCOPE & OBJECTIVE:

Configure application preferences and environment parameters.

Manage environment toggles in development, mock data, and auth settings.

Remove Mock Data: Comprehensive cleanup tool that removes all test bookings, customers, and transactions across Supabase and Local Storage.

Adjust features visibility and refine operational defaults.

Danger Zone includes "Restore Default Data" to reset seed measurements without losing user records.

CHAPTER 119 • DASHBOARD

SETTINGS (QUICK ACCESS)

CHAPTER SCOPE & OBJECTIVE:

Open configuration to manage environment and operational preferences.

Adjust inventory, alerts, and development toggles.

Use destructive actions like data deletes with caution.

CHAPTER 120 • MENU

USERS & PERMISSIONS

CHAPTER SCOPE & OBJECTIVE:

Manage staff accounts and access levels.

Overview: Security and role management for the application.

- **Roles:** Define who is an Admin, Employee, or Lead Detailer.
- **Security:** Reset passwords and disable accounts for terminated staff.

CHAPTER 121 • MENU

USERS & ROLES

CHAPTER SCOPE & OBJECTIVE:

Centralized user management for admins, employees, customers, and prospects.

Overview: Manage all user types in one place with quick creation, deletion, and overview stats.

5 Stats Cards: View counts for Admins (●), Employees (●), Customers (●), Prospects (●), and Total Users (●).

Refresh Button: Manually refresh all user data anytime with visual loading indicator.

When to Use Users & Roles:

- ✓ Quick user creation (any type)
- ✓ Delete users safely
- ✓ View stats and overview
- ✓ Bulk management tasks

Administrators Section (● Amber):

- Create admins via Edge Function (secure)
- View admin list with roles and last update
- Delete admins with confirmation
- Search admins by name or email

Employees Section (● Blue):

- Onboard new employees quickly
- Edit employee details inline
- Delete employees with confirmation
- Search employees by name or email

Customers Section (● Purple):

- Add customers with name, email, phone
- Edit button navigates to Customer Profiles page
- Delete customers (checks for vehicles first)
- Search customers by name or email

Prospects Section (● Orange):

- Add prospects for lead tracking
- Edit button navigates to Prospects page
- Delete prospects (checks for vehicles first)
- Search prospects by name or email

Safety Features:

- ✓ Delete Protection: Cannot delete customers/prospects with linked vehicles
- ✓ Confirmation Dialogs: Always asks before deleting
- ✓ Helpful Errors: Shows exactly what's wrong (e.g., "Customer has 3 vehicles linked")

✔ Auto-Refresh: Tables update after creation/deletion

When NOT to Use Users & Roles:

- ✗ Detailed customer information → Use Customer Profiles
- ✗ Vehicle management → Use Customer Profiles
- ✗ Lead tracking/conversion → Use Prospects page
- ✗ HR tasks/payroll → Use Company Employees

Pro Tips:

💡 Use Users & Roles for quick adds, dedicated pages for detailed work

💡 Edit buttons navigate to the appropriate detailed page

💡 Search works across all sections simultaneously

💡 Color coding helps identify user types at a glance

CHAPTER 122 • MENU

USER MANAGEMENT - QUICK TIPS

CHAPTER SCOPE & OBJECTIVE:

Quick reference guide for when to use each user management page.

When to Use Each Page: **Users & Roles (Operations Menu)**

Use for: Quick admin tasks

- ✓ Add new users (any type)
- ✓ Delete users
- ✓ View stats/overview
- ✓ Bulk management
- ✗ Don't use for: Detailed info, vehicles, bookings

 Customer Profiles

Use for: Customer details

- ✓ Search customers
- ✓ Manage vehicles
- ✓ View booking history
- ✓ Detailed customer info

 Prospects

Use for: Sales & leads

- ✓ Track leads
- ✓ Lead source tracking
- ✓ Follow-up management
- ✓ Convert to customers

 Company Employees

Use for: HR tasks

- ✓ Employee details
- ✓ Contact information
- ✓ Payroll management
- ✓ Role management

Quick Reference:

- Add a new customer quickly → Users & Roles
- Find customer's vehicles → Customer Profiles
- Delete test data → Users & Roles
- Track a lead → Prospects

- Convert prospect to customer → Prospects
- View employee pay rate → Company Employees
- See user stats → Users & Roles
- Search for a customer → Customer Profiles

Color Guide:

- Amber = Admins
- Blue = Employees
- Purple = Customers
- Orange = Prospects
- Emerald = Total

Safety Features:

- ✓ Delete Protection - Can't delete customers/prospects with vehicles
- ✓ Confirmation Dialogs - Always asks before deleting
- ✓ Refresh Button - Manual data refresh anytime
- ✓ Search Filters - Find users quickly

Pro Tips:

💡 Deleting Customers: If you get an error, they have vehicles. Delete vehicles first.

💡 Prospects: Use the Prospects page for detailed lead tracking, Users & Roles for quick adds.

💡 Refresh: Click the refresh button after creating users to see them immediately.

💡 Navigation: Edit buttons take you to the detailed page for that user type.

CHAPTER 123 • DASHBOARD

USER MANAGEMENT

CHAPTER SCOPE & OBJECTIVE:

Admin • Employee rights with create, edit, impersonate, delete.

Create and edit users with roles admin/employee.

Impersonate users to validate role-based views.

Delete users with safety confirmations.

CHAPTER 124 • MENU

MY PROFILE & NOTIFICATION SETTINGS

CHAPTER SCOPE & OBJECTIVE:

Personalize your account and contact preferences.

Overview: Manage your own identity within the Prime ecosystem.

- **Identity:** Update your email, password, and profile avatar.
- **Alerts:** Control how and when you receive system notifications.

CHAPTER 125 • CHEMICALS

SMART SYNC: FIX DUPLICATES

CHAPTER SCOPE & OBJECTIVE:

Learn how the automated inventory cleanup and linking tool keeps your shop organized.

The Smart Sync Engine: This pro-grade tool performs two critical tasks to maintain your shop's data integrity:

1. Intelligent Deduplication

The system scans for products with the same **Name and Brand**. If duplicates are found:

- **Data Priority:** It identifies which record has the most **Dilution Ratio** data (your work) and keeps it as the "Master."
- **Safety:** It then safely removes the empty or redundant placeholder records while preserving your formulas.

2. Global Bulk Linking

The tool doesn't just fix duplicates—it also audits your entire shop for unlinked items:

- **Auto-Match:** It cross-references your shelf inventory against the **Chemical Knowledge Base** (Cards).
- **Instant Link:** Any item matching a professional card will be linked automatically. This pulls in all AI-generated dilution ratios, safety data, and application guides instantly.

 **How to Use:** Click the "**Fix Duplicates (?)**" button in the **Chemical Library** toolbar. It will run a full shop audit and report how many items were merged and linked.

 **Audit Trail (Timestamps):** Every inventory item now displays a "**Last Updated**" timestamp in the top-right corner. This provides a clear visual audit trail of when the item was last modified, ensuring your team knows they are working with the latest data.

 **Safety Guard:** While the cleanup tool is interactive in **Demo Mode**, it will never modify your production database. A "Simulation Mode" warning will appear, and all deletions or link updates are blocked to protect your real-world inventory during training.

CHAPTER 126 • SYSTEM

DELETING RECORDS & TEST DATA CLEANUP

CHAPTER SCOPE & OBJECTIVE:

The 3 ways to permanently remove customers, prospects, or individual booking records from the system.

When to Delete: Only delete records that are genuine test entries or mistakes. For real customers who are simply inactive, use **Archive** instead — it hides them from your active lists while keeping their history intact.

 THE 3 DELETION POINTS**1 Delete a Customer Profile (Safe)**

- **Where:** Customer Database page → find the person → click the Trash icon on their card.
- **What it removes:** The profile and their vehicles. Their **booking history is preserved** — bookings are detached from the profile but remain in Booking History.
- **Use this when:** The person is a test account you never want to see again.

2 Delete a Prospect Profile (Safe)

- **Where:** Prospects page → find the person → click the Trash icon on their card.
- **What it removes:** The prospect profile and their vehicles. Their **bookings are preserved** and remain in Booking History.
- **Use this when:** A test lead was created that should not exist.

3 Delete a Single Booking/Job Entry (Surgical)

- **Where:** Booking History page → find the customer card → look at the Activity Logs on the right → click the red Delete button on that specific log entry.
- **What it removes:** Only that one appointment record — the customer profile and vehicles remain untouched.
- **Use this when:** A real customer has a specific test booking on their history that is skewing your reports.

 VIRTUAL CUSTOMERS (No Profile — Booking Only)

If a name appears in Booking History but NOT in the Customer Database, they are a "Virtual Customer." They exist because of an online booking where their profile creation failed or was skipped.

- **To remove them:** Delete the booking from the Booking History page (Deletion Point 3). Once their last booking is gone, they automatically disappear from the list.
- **To promote them:** Use the **"Add to Prospects"** button on their Booking History card to formally create a Prospect profile for them.

 ADMIN-ONLY ACTION

All three deletion types require Admin privileges. If you attempt to delete as a non-admin user, the system will display an "Access Denied" message and block the action.

 **Pro Tip — Archive vs. Delete:** If you are unsure, choose **Archive** first. Archived records are hidden from normal views but can be restored at any time. A deletion is permanent and cannot be undone.

CHAPTER 127 • SYSTEM

TEST CUSTOMER & SANDBOX WORKFLOW

CHAPTER SCOPE & OBJECTIVE:

*If you want to test how an estimate looks to a customer, you **MUST** log in (either by logging out of Admin to use the auto-fill login, or by typing it manually in an Incognito window). The public "Auto-fill" button won't get you inside the private dashboard!*

The Safe Testing Protocol: The system includes a specially programmed test account ("Rick Berube") designed to let you experience the full customer journey safely, while giving you the ability to cleanly remove the test data afterward so your real analytics are unaffected.

 PHASE 1: Creating the Test Data (Public or Admin)**1. Using Auto-Fill Buttons:**

- In your Admin dashboard or on the public website (Contact / Book Now / Phone Assistant), look for the button labeled " **Auto-Fill Rick Berube Test**".
- Clicking this automatically fills out the form with your test details and safely scopes the email to **rberube54+test@gmail.com**.
- Submit the form to generate a test inquiry or booking.

2. The "Test Data Active" Banner:

- As soon as the "Rick Berube" test account is created in the database, a persistent **RED BANNER** will appear at the bottom of your screen.
- This banner serves as a constant reminder that your dashboard analytics are currently being affected by test data.
- It will remain visible across the app until the test data is wiped.

 PHASE 2: Testing the Customer Portal Login

Because your primary email is the Admin email, you cannot use it to view the Customer Portal (the system will always recognize you as the boss and redirect you). You have two ways to log in as the test customer:

Method A: Standard Browser (Easiest)

1. Log out of your Admin account.
2. The system will **automatically pre-fill** the login form with the default credentials (`rberube54+test@gmail.com` and password `Test123`).
3. Click Sign In to securely enter the Customer Portal.

Method B: Incognito/Private Window

(If you want to keep your Admin window open at the same time)

1. Open an Incognito window and go to the Login Page.
2. The form **will NOT** be pre-filled (incognito blocks memory of your Admin session).
3. You must manually type the default test credentials:
 - **Email:** `rberube54+test@gmail.com`
 - **Password:** `Test123`
4. Click Sign In.

 Important Note on the First Login (Email Confirmation):

If this is your first time logging in as the test account, the system will auto-register the account for you securely. Because of Supabase security settings, it will send an **"Confirm your signup" email** to your inbox.

- **This is completely safe and expected.**
- **Device Restriction:** Since you are testing on `localhost` (your computer), the link in the email will point to `localhost`. Therefore, **you MUST open that email and click the confirmation link on the exact same computer** you are developing on. Clicking it on your phone will fail because your phone does not know what `localhost` is.
- *(Note: Because Gmail ignores the `+test` modifier, all test estimates, invoices, and confirmation emails will safely arrive in your standard primary inbox!)*

PHASE 3: Invoicing, Analytics & Accounting

1. Log back in as Admin, convert the approved Estimate to an Invoice.
2. Mark it as "Sent" and process a "fake" payment against it.
3. Check your **Analytics** and **Accounting** pages! You will see that your Rick Berube test revenue instantly causes your charts and totals to rise exactly like a real customer, giving you 100% confidence that the business formulas are working correctly.

PHASE 4: Wiping the Test Data (Automated 1-Click Wipeout)

While normally in a CRM, deleting a customer account **does not** delete their financial records (to protect real revenue data), the system has been explicitly programmed to recognize the "Rick Berube" test account.

How to Completely Wipe Your Test Footprint:

Simply click the **"Wipe Test Data Now"** button located directly inside the red **"Test Data Active"** banner at the bottom of your screen.

Behind the scenes, the system will instantly cascade the deletion to completely wipe out:

- All test **Invoices & Payments (Accounting)**
- All test **Estimates**
- All test **Bookings (Analytics)**
- All test **Vehicles**
- All test **Customer & Prospect Records**

Check your Analytics and Accounting pages afterward—you will see that all your numbers, calculations, and charts have instantly reverted back to their previous, real values as if the test account never existed, and the red banner will vanish!

CHAPTER 128 • MENU

PHOTO & MEDIA MANAGEMENT SYSTEM

CHAPTER SCOPE & OBJECTIVE:

Two-layer photo system for customer profiles and vehicle-specific media.

Overview: The app uses a two-layer system to organize photos separately for customers and their vehicles.

 Layer 1: Customer Profile Media

Top section labeled "GENERAL PROFILE MEDIA (Account Level)"

What Goes Here:

- Customer headshots and ID photos
- Profile pictures
- Any photos of the person themselves

Categories:

- PROFILE / GENERAL - General customer photos
- MISC BEFORE - Photos before working with your company
- MISC AFTER - Photos showing results/after service

Storage: Saved to customers table (general_photos, before_photos, after_photos)

Persistence: Stays even if customer doesn't have a vehicle

 Layer 2: Vehicle-Specific Media

Bottom section labeled "VEHICLE-SPECIFIC MEDIA"

What Goes Here:

- Before/After detailing photos
- Vehicle condition documentation
- Damage photos
- General car photos

Categories (per vehicle):

- BEFORE PHOTO - Vehicle condition before service
- AFTER PHOTO - Vehicle condition after detailing
- GENERAL PHOTO - General vehicle photos

Storage: Saved to vehicles table linked to customer

Independence: Each vehicle has its own photo gallery

 Real-World Example:

Serge Michaud has 2 vehicles:

1. Upload Serge's ID photo in top section

→ Shows in Media Library under "Serge Michaud (Customer Photos)"

2. Upload before/after photos for 2020 Toyota Versa

→ Shows under "Serge Michaud → Toyota Versa"

3. Upload different photos for 2018 Ram 1500

→ Shows under "Serge Michaud → Ram 1500"

Result: 3 separate photo galleries, all organized under Serge

Best Practices:

Use Customer Photos For:

- ✓ Customer ID/license for records
- ✓ Customer with their vehicle (person visible)
- ✓ Profile pictures for identification

Use Vehicle Photos For:

- ✓ Before/after detailing work
- ✓ Vehicle condition documentation
- ✓ Damage or scratch documentation
- ✓ Progress photos during service

Organizing Tips:

- Always add vehicle first before uploading vehicle photos
- Upload before photos BEFORE starting work
- Upload after photos immediately after completion
- Customer photos are optional but helpful

Troubleshooting:

"I uploaded photos but don't see them in Media Library"

- Hard refresh the page (Ctrl + Shift + R)
- Verify you clicked "Save Prospect" or "Save Customer"
- Check photos in customer editor - they should persist

"Photos disappeared after saving"

- Check browser console for errors
- Verify Supabase storage permissions
- Ensure customer_id is correctly linked to vehicle

"Can't upload photos"

- Check file size (max 10MB per photo)
- Verify supported formats: JPG, PNG, WebP
- Ensure Supabase storage buckets exist

Data Flow:

1. Upload photo in Customer Editor
2. Photo saved to Supabase Storage bucket
3. Photo URL saved to database
4. Media Library queries database
5. Photos displayed grouped by customer/vehicle

Quick Reference:

Customer photo → Top section → customers table

Vehicle photo → Bottom section → vehicles table

View all → Media Library → Organized by customer

See also: "Media Library Gallery" for viewing all photos

CHAPTER 129 • MENU

MEDIA LIBRARY & GENERAL GALLERY

CHAPTER SCOPE & OBJECTIVE:

Master your shop's visual marketing assets and customer vehicle history.

The Prime Media Engine: A centralized hub for managing professional photography, before/after transformations, and general marketing assets.

 1. Organized Vehicle Gallery

The "Customers & Vehicles" tab provides a chronological timeline of every vehicle serviced.

- **Categorization:** Tag photos as "General", "Before", or "After" to keep job history organized.
- **Visual Timeline:** Review a vehicle's condition over months or years of service.
- **Video Support:** Embed walk-around videos for better proof-of-work.

 2. General Marketing Gallery

Use the "General Gallery" tab for your best showroom finishes, shop photos, and training assets.

- **Full-Featured Management:** Includes search, keyword sorting, and bulk management tools.
- **Metadata Entry:** Add high-quality titles and descriptions to items for better categorization.
- **Asset Sharing:** Quickly copy external links or download high-res files for social media posts.

 3. High-Speed Uploads

Add media from any device using the "Upload Media" button.

- **Direct Camera Capture:** Optimized for mobile field use—take a photo and it's instantly linked to the customer.
- **Batch Uploading:** Multiple file selection for rapid gallery building.
- **Mock Mode (Demo):** Practice uploading in training mode with simulated success.

 **Pro Tip:** Use the "Copy URL" feature in the General Gallery to past assets directly into the **Prime Blog** or **Customer Outreach** center.

CHAPTER 130 • MENU

BUSINESS DRIVE & FILE MANAGER

CHAPTER SCOPE & OBJECTIVE:

Cloud-integrated digital storage with green folder indicators, PDF archives, and Gemini AI analysis.

Overview: The Business Drive (Docs) represents our pro-grade digital storage system integrated inside the File Manager. It secures all generated operational files, media, and records under unified cloud-backed directories.

1. Active Green Folder Indicators

- **Visual Integrity:** To save time when searching, folders inside your **Business Drive** are equipped with a smart visual indicator. If a folder contains one or more files or pictures, its icon **lights up in green**, indicating active contents. Empty folders remain in a sleek default slate color.

2. Structured Operational Folders

- **Category Separation:** Your operational assets, media, PDFs, and invoices are organized into designated folders (Analytics, QR Codes, Inventory, Pricing, Operations, Addons, Chemicals, My Logos, and Test/Demo).

3. Supabase Integration & Auto-Sync

- **Cloud-Backed Storage:** All documents are hosted on secure cloud buckets. Platform files such as generated Estimates, Invoices, Certificates, and employee documents flow into their respective directories automatically.

4. Ask Gemini AI Folder Analysis

- **Automated Summarization:** Click the specialized "**Analyze Folder**" button powered by Ask Gemini AI. It instantly scans, reviews, and summarizes all the documents, logs, and files located inside that specific directory to get you up to speed in seconds.

5. Cross-Platform Rig Sync

- **Field Coordination:** Rig setup orientations, media walkthroughs, and equipment images uploaded by mobile detailers in the field sync automatically to their folders on the master computer.

6. Active File Alerts

- **Track Review Status:** The system alerts you to new files that require administrative sign-off or review, with one-click dismissal once checked.

CHAPTER 131 • MENU

STICKY NOTES

CHAPTER SCOPE & OBJECTIVE:

Your dynamic, tag-based virtual sticky note board.

Overview: The Sticky Notes module is an advanced, flexible space for jotting down ideas, managing quick tasks, and setting reminders.

 1. Creating Notes & Formatting

Click the "+ New Sticky" button. As you type, the system automatically detects special formatting:

- **Numbering System:** If you type `1.` , `a.` , `-` , or `\*` at the start of a line, it will automatically indent the text appropriately to create clean, readable lists.
- **Checkboxes / Status Boxes:** The system has built-in task tracking! Type the following at the beginning of any line:
 - `[ ]` creates a blank "To Do" box.
 - `[x]` creates a completed "Done" box (and crosses out the text).
 - `[w]` creates a "Waiting" box (highlights text in yellow).
 - `[n]` creates a "Not Done / Cancelled" box (highlights text in red).

(You can also use the toolbar while editing to insert these automatically!)

 2. Reminders & Badges

Click the alarm bell icon on any note to set a custom date/time reminder. When the time arrives, you will get a popup notification. The Active Reminders badge in the menu tracks all your pending items.

 3. Organization & Filters

Pin important notes to keep them at the top. Use the Pin icon in the top right toolbar to quickly toggle your view between "Showing All", "Showing Pinned", and "Showing Un-pinned" notes.

You can also use the left sidebar to filter by "All Stickies", specific Tag Groups, or "Others (Un-pinned)".

 4. Sticky Note Settings (Visibility Menu)

Click the Sliders icon in the top right to customize how your board looks and feels:

- **Animations:** Choose how notes appear when you open/close them (Smooth, Pop, Bounce, Slide, Flip).
- **Tags Visibility:** Toggle whether the colored tag labels are visible at the bottom of each note.
- **Masonry vs Grid Layout:** Choose between a structured Grid layout or a dynamic Masonry layout (where notes stack tightly together like a real corkboard).
- **Isolate Mode:** When enabled, this completely hides any notes that do not explicitly have the "__sticky-notes__" system tag, allowing you to hide clutter.
- **Line Spacing:** Set the default spacing between lines of text (the 1.625 Custom setting is perfectly calibrated to align with the Status Boxes!).

CHAPTER 132 • MENU

PERSONAL NOTES & SECURE JOURNAL

CHAPTER SCOPE & OBJECTIVE:

Manage your private notes and professional daily records.

Overview: The Personal Notes system is your private space for documenting job details, customer preferences, or business ideas.

 1. Creating Notes

Click the "Personal Notes" link in the sidebar or use the quick-action button on the dashboard. Notes are saved automatically as you type.

 2. Privacy & Security

Your notes are private to your account. Other employees or admins (unless they have impersonation rights) cannot see your personal journal entries.

 3. Organization

Use the search bar at the top of the notes page to find specific entries by keyword, date, or customer name mentioned in the text.

 **Pro Tip:** Use this to record "unwritten rules" for specific regular customers to ensure you always exceed their expectations.

CHAPTER 133 • MENU

PRIME LETTER MAKER

CHAPTER SCOPE & OBJECTIVE:

Generate professional branded business letters and formal quotes.

Professional Communication: The Letter Maker allows you to create high-end PDF documents with your company letterhead.

 1. Templates

Choose from pre-built templates for Appointment Confirmations, Quote Follow-ups, and Vendor Inquiries.

 2. Customization

Edit the body text, add customer details from the CRM, and include digital signatures for a professional finish.

 3. Archiving

All generated letters are automatically saved to the File Manager under the "Communications" folder for future reference.

CHAPTER 134 • MENU

ALERTS & NOTIFICATIONS

CHAPTER SCOPE & OBJECTIVE:

System alerts for admins and employee notifications underpin proactive workflows.

Admin alerts include overdue tasks, todo updates and comments, and file manager events.

Employee notifications deliver direct notice for new/updated task assignments.

Notification Bell shows unread counts and provides quick navigation.

CHAPTER 135 • DASHBOARD

REAL-TIME ALERTS

CHAPTER SCOPE & OBJECTIVE:

System alerts banner with unread counts and quick actions.

Unread alerts show for payroll due, low inventory, new files, and overdue tasks.

Use Dismiss and Dismiss All to clear reviewed alerts.

Alerts sync across tabs; updates trigger badges in the sidebar.

CHAPTER 136 • DASHBOARD

ADD CUSTOMER (QUICK ACTION)

CHAPTER SCOPE & OBJECTIVE:

Open modal to create a customer and link records.

Enter core contact data; system deduplicates by email/phone when possible.

Link tasks or invoices immediately after creation.

CHAPTER 137 • DASHBOARD

MENU VISIBILITY CONTROLS

CHAPTER SCOPE & OBJECTIVE:

Show/hide sidebar items; syncs across tabs via storage events.

Toggle checkboxes to show or hide items like Inventory, File Manager, Tasks, etc.

Changes update the slide-out menu and dashboard tiles instantly.
