HOW TO USE THIS MANUAL

Welcome to the **Prime Auto Detail Application & Operations Manual**. This document serves as the single source of truth for all operational, technical, financial, and chemical standards within the business. Whether you are an experienced shop manager, an intake specialist, or a field detailing technician, this manual provides clear guidelines for every situation you encounter.

8 Core Operational Parts

Topics are grouped into 8 parts reflecting the natural flow of business operations: from initial customer lead generation through chemical dilution, mobile rig logistics, financial accounting, and platform security.

Structured Reference Tables

Key chapters feature standardized matrices—such as the Master Chemical Dilution Chart, Package Pricing Tiers, and Vehicle Classifications—designed for fast lookup on the shop floor or in mobile rigs.

Interactive In-App Route Badges

Every chapter identifies the exact application route (e.g., /availability-manager) where the feature lives in the web app, allowing immediate hands-on practice.

Glossary & Subject Index

Refer to the Glossary at the back of the manual for precise definitions of app-specific acronyms (IAC, RB Test, Smart Sync, F150 Command Center) and consult the Alphabetical Index for quick topic location.

 **Best Practice for Daily Operations:** Keep a printed copy of this manual bound in the shop office and a synchronized PDF on every mobile rig tablet. When onboarding new team members, assign Chapters 1–13 (Operations & Customer Journey) and Chapters 45–68 (Chemical Mastery) as mandatory week-one reading before unsupervised field dispatches.

TABLE OF CONTENTS

PART 1: MASTER OPERATIONS & THE CUSTOMER JOURNEY

18 Chapters

End-to-End Detailing Lifecycle & Relationship Engineering

1. Master Operations Flow	Ch. 1	2. Mastering the Customer Lifecycle	Ch. 2
3. End-to-End Online Booking Workflow	Ch. 3	4. Prospect vs. Customer Logic	Ch. 4
5. Retention Hub & Outreach	Ch. 5	6. Smart Mission Logic Inspector	Ch. 6
7. Test Customer & Sandbox Workflow	Ch. 7	8. Deleting Records & Test Data Cleanup	Ch. 8
9. Testimonials Management	Ch. 9	46. Garage & Vehicle Management	Ch. 46
59. Estimates & Quotes	Ch. 59	69. Phone Assistant Utility	Ch. 69
75. Customer Profiles & History	Ch. 75	87. Client Experience Preview	Ch. 87
108. Customer Database & Garage Management	Ch. 108	109. Photo & Media Management System	Ch. 109
118. Customer Data Reports	Ch. 118	134. Add Customer (Quick Action)	Ch. 134

PART 2: CORE CUSTOMER, GARAGE & APPOINTMENT ARCHITECTURE

16 Chapters

Data Records, Scheduling Matrices & Production Execution

10. Vehicle Type Classification	Ch. 10	11. Hybrid Availability & Scheduling	Ch. 11
12. Booking Test Mode	Ch. 12	13. Hosted Estimate Acceptance Portal	Ch. 13
14. Professional Service Checklist	Ch. 14	15. Checklist Tools Guide	Ch. 15
16. Checklist Final Steps & Offline Capability	Ch. 16	17. Client Pre-Service Evaluation	Ch. 17
58. Multi-Vehicle Bookings	Ch. 58	72. Staff Scheduling & Shifts	Ch. 72
73. Booking & Appointment Manager	Ch. 73	76. Prospect & Lead Management	Ch. 76
85. Website Administration	Ch. 85	125. Booking Calendar Analytics	Ch. 125
127. Business Analytics & Insights	Ch. 127	136. Customer Management & Booking Flow	Ch. 136

PART 3: PACKAGES, SERVICES & FINANCIAL ENGINEERING

17 Chapters

Pricing Tiers, Invoicing Infrastructure & Business Health

18. Service & Package Pricing	Ch. 18	19. Package Comparison Tool	Ch. 19
20. Hosted Invoice Payment Portal	Ch. 20	21. Quick Pay (In-Person Payments)	Ch. 21
22. Break-Even Analysis	Ch. 22	23. Promo Codes & Marketing	Ch. 23
24. Jobs Completed	Ch. 24	43. Compensation Calculator	Ch. 43
60. Invoicing & Payments	Ch. 60	61. Business Accounting	Ch. 61
63. Employee Payroll	Ch. 63	64. Company Budget	Ch. 64
67. Intelligent Logic Grouping	Ch. 67	70. Financial Summary & Valuation	Ch. 70
114. Company Employees	Ch. 114	119. Invoice & Payment Audits	Ch. 119
123. Full Business Accounting Report	Ch. 123		

PART 4: CHEMICAL MASTERY, DILUTIONS & INVENTORY CONTROL

26 Chapters

Surface Science, Concentrates & Asset Accounting

25. Chemical Decision System	Ch. 25	26. Dilution Reference Chart	Ch. 26
27. Chemical Workflow	Ch. 27	28. AI Chemical Assistant	Ch. 28
29. Chemical Inventory Modal	Ch. 29	30. Master Inventory Control	Ch. 30
31. Chemical Label Maker	Ch. 31	45. Chemical Description & Tips	Ch. 45
49. Master Ratio: Source of Truth	Ch. 49	50. Understanding Links vs. Cards	Ch. 50
51. Smart Sync: Fix Duplicates	Ch. 51	52. Rick's Tips & Admin Controls	Ch. 52
53. Chemical Documentation v3	Ch. 53	57. Checklist Chemical Management	Ch. 57
65. Reports Center Masterclass	Ch. 65	78. Chemical Knowledge Cards	Ch. 78
79. Chemical Ratio Modal	Ch. 79	80. Interactive Dilution Manager	Ch. 80
81. Inventory Audit Checklist (IAC)	Ch. 81	83. Mobile Unit Configuration	Ch. 83
89. Prime Dilution Calculator	Ch. 89	98. Prime Dilution Masterclass	Ch. 98
99. Chemical Cards (Knowledge Base)	Ch. 99	110. Inventory Control	Ch. 110
120. Inventory Value Reports	Ch. 120	137. Materials & Equipment Usage Report Log	Ch. 137

PART 5: FLEET, EQUIPMENT & MOBILE COMMAND OPERATIONS

10 Chapters

F150 Rig Architecture, Logistics & Digital Assets

32. Media Library & General Gallery	Ch. 32	33. Business Launch Manager	Ch. 33
48. Guided Training & Demo Mode	Ch. 48	86. Employee Training & Access Hub	Ch. 86
88. Technician Certification Program	Ch. 88	91. New Employee Orientation	Ch. 91
112. Alerts & Notifications	Ch. 112	115. Training & Exams	Ch. 115
131. Cheat Sheet & Exam Control	Ch. 131	132. User Management	Ch. 132

PART 6: HUMAN RESOURCES, COMPENSATION & TRAINING ACADEMY

8 Chapters

Staff Development, Certification & Performance Analytics

34. Staff Profiles & Compensation	Ch. 34	35. Users & Roles	Ch. 35
66. Temporal Scan (Date Filtering)	Ch. 66	82. Materials & Equipment Usage Log	Ch. 82
117. Reports & Analytics Hub	Ch. 117	121. Technician Performance Analytics	Ch. 121
122. Estimates & Quote Performance	Ch. 122	124. Tax & Sales Tax Summary	Ch. 124

PART 7: DIGITAL PRESENCE, MARKETING & WEB ADMINISTRATION

10 Chapters

Customer Portals, CMS Controls & Brand Presentation

36. FAQs Management	Ch. 36	37. Contact Control	Ch. 37
38. Sticky Notes	Ch. 38	39. Website	Ch. 39
40. Settings	Ch. 40	94. Detallers Blog Management	Ch. 94
95. Elite Story Master (Reordering)	Ch. 95	101. Website Content Management	Ch. 101
103. Service Disclaimers & Descriptions	Ch. 103	107. Main Menu / Header Control	Ch. 107

Security Policies, Role Access & Platform Utility

41. Admin Dashboard	Ch. 41	42. Main Menu	Ch. 42
44. Time & Profitability Dashboard	Ch. 44	47. Net Profit & Valuation Breakdown	Ch. 47
54. Caddy Worksheet	Ch. 54	55. Contact Form: Photo Attachments	Ch. 55
56. Mobile Setup (F150 Command Center)	Ch. 56	62. Mileage Tracker	Ch. 62
68. Tax Preparation	Ch. 68	71. Add-on & Upsell Scripts	Ch. 71
74. Shop Tasks & Reminders	Ch. 74	77. Users & Permissions	Ch. 77
84. Vendor & Supplier Management	Ch. 84	90. Detailing Learning Library	Ch. 90
92. Secure Team Communication	Ch. 92	93. Business Card & QR Generator	Ch. 93
96. Application Master Settings	Ch. 96	97. My Profile & Notification Settings	Ch. 97
100. Winter & Seasonal Closures	Ch. 100	102. Vehicle Type Management	Ch. 102
104. Home Page Content Control	Ch. 104	105. About Page Content Control	Ch. 105
106. Footer Content Control	Ch. 106	111. Business Drive & File Manager	Ch. 111
113. User Management - Quick Tips	Ch. 113	116. Discount Coupons	Ch. 116
126. Personal Notes & Secure Journal	Ch. 126	128. Shop Setup & Configuration	Ch. 128
129. Prime Letter Maker	Ch. 129	130. Real-time Alerts	Ch. 130
133. Settings (Quick Access)	Ch. 133	135. Menu Visibility Controls	Ch. 135

PART 1 OF 8

MASTER OPERATIONS & THE CUSTOMER JOURNEY

End-to-End Detailing Lifecycle & Relationship Engineering

The definitive architectural walkthrough of client acquisition, intake workflows, transparent retention automation, data hygiene, and lifecycle management.

Contains 1 structured operational chapters.

CHAPTER 1 • SYSTEM

MASTER OPERATIONS FLOW

CHAPTER SCOPE & OBJECTIVE:

The complete start-to-finish workflow for professional detailing operations and customer lifecycles.

MASTER OPERATIONS WORKFLOW MATRIX

Summary of the six operational phases governing the Prime Auto Detail lifecycle.

PHASE	TRIGGER / EVENT	PRIMARY TOOL / VIEW	CORE ACTION	RESULTING RECORD
1. Lead Capture	Inquiry from phone/form	Prospects Page	Create contact record	Prospect Profile
2. The Commitment	Client confirms booking	Bookings Calendar	Assign vehicle & package	Confirmed Appointment
3. Rig Preparation	Day of service setup	Prep Summary Tool	Gather chemical caddy & gear	Ready Rig Checklist
4. Job Execution	Service start	Service Checklist	Digital inspection & timer	Completed Steps Audit
5. Billing & Close	Service completed	Invoicing / Quick Pay	Collect card/cash/check	Paid Taxable Invoice
6. Retention Cycle	4-8 weeks post-service	Follow-Up Center	Send maintenance reminder	Repeat Client Booking

The Prime Methodology: This system is built on a **CRM-First Architecture**. To ensure your shop runs like a professional machine, every action should follow the "Customer Master Record" logic.

PHASE 1: LEAD CAPTURE (THE PROSPECT)

- **When:** Anytime a potential client inquiries but hasn't booked.
- **Action:** Create a record in the **Prospects** page.
- **Why:** Keeps your active client list clean and lets you track follow-up conversion rates.

PHASE 2: THE COMMITMENT (THE BOOKING)

- **Order of Operations:** Search CRM → Select/Add Customer → Assign Vehicle from Garage → Select Package.
- **Automation:** Once saved, the system auto-calculates pricing based on **Vehicle Class + Package**. Never manually guess a price again.

PHASE 3: PREPARATION (RIG SETUP)

- **When:** Day of service.
- **Tool:** Open the **Prep Summary** PDF in the checklist. It lists every specific chemical and tool needed for that specific job so you gather everything at once.

PHASE 4: EXECUTION (THE SERVICE)

- **Action:** Start the **Job Timer** in the Service Checklist.
- **Logic:** Every checked step creates a permanent audit trail. Use the **Digital Inspection** tool to document pre-existing damage before touching the car.

PHASE 5: COMPLETION & BILLING

- **Automation:** Clicking "Finish & Complete Job" stops the timer and generates a **Pending Invoice** automatically.
- **Payment:** Collect payment via the mobile-ready interface. Mark as **Paid** to move the revenue into your Ledger.

PHASE 6: THE CYCLE (RETENTION)

- **When:** 4-8 weeks later.
- **Tool:** The **Follow-Up Center** alerts you that the client is "Due for Service" based on their maintenance cycle.
- **The Goal:** Turn a one-time booking into a lifetime maintenance client.

THE "DIRECT BOOKING" FLOW (PHONE/EMAIL)

When a customer calls or emails and wants to book immediately (skipping the "Prospect" lead phase):

1. **Open Bookings:** Go directly to the **Bookings** page.
2. **Customer Link:** Click the "+" to add a new booking. In the **Customer** field, start typing their name.
3. **Instant Creation:** If they are new, click "Add New Customer" from the dropdown. Fill in their Phone and Email immediately—this creates their permanent CRM record.
4. **Add Vehicle:** Enter the Year, Make, and Model. **CRITICAL:** Set the **Vehicle Type** (e.g., Mid-Size/SUV) to trigger the correct pricing.
5. **Package selection:** Choose the service. The system will auto-populate the price based on your master settings.
6. **Save & Sync:** Once you click **Save**, the customer is in your CRM, the vehicle is in their Garage, and the appointment is on your calendar.

SYSTEM LOGIC & BEST PRACTICES

- **Master Records:** The **Customer** is the owner. **Bookings** are events. NEVER delete a Customer with history; always **Archive** instead.
- **Duplicates:** Search before you save! Duplicates are the #1 cause of lost service history.
- **Invoices:** Never delete a financial record. If an error occurs, "Cancel" or "Void" it to maintain a clean tax trail.

 **Pro Tip:** The smartest workflow is to ALWAYS start with a search in the **Bookings** or **Customers** page. If they aren't found, that is your trigger to create a new profile.

PART 3 OF 8

PACKAGES, SERVICES & FINANCIAL ENGINEERING

Pricing Tiers, Invoicing Infrastructure & Business Health

Systematic breakdowns of service menu structures, time/profitability analytics, point-of-sale rapid checkout, tax ledgers, and break-even forecasting.

Contains 1 structured operational chapters.

SERVICE & PACKAGE PRICING

CHAPTER SCOPE & OBJECTIVE:
Manage master pricing for packages, add-ons, multipliers, and human-readable audit history.

SERVICE PACKAGE MATRIX & VEHICLE SIZING TIERS					
Tiered service packages with vehicle category multiplier baselines.					
PACKAGE NAME	EST. TIME	COUPE / COMPACT	SEDAN / MID SUV	FULL TRUCK / 3-ROW	LUXURY / EXOTIC
Express Clean & Protect	1.5 - 2 hrs	\$129.00	\$149.00	\$179.00	\$199.00
Interior Deep Sanctuary	2.5 - 3.5 hrs	\$199.00	\$229.00	\$269.00	\$299.00
Exterior Precision Gloss	2.0 - 3.0 hrs	\$189.00	\$219.00	\$259.00	\$289.00
Full Prime Essential	4.0 - 5.5 hrs	\$329.00	\$369.00	\$429.00	\$489.00
Signature Ceramic Package	6.0 - 8.0 hrs	\$649.00	\$729.00	\$849.00	\$999.00

Overview: The Package Pricing page is the central command center for all pricing across the application. Any changes made and saved here will instantly ripple through the entire CRM, updating the Phone Assistant, Client Evaluation scripts, Invoice generators, and the live Customer Booking Portal.

⚙️ 1. How Pricing Architecture Works

- **Centralized Base Prices:** The system relies on hardcoded base prices. This page acts as an "Override Manager".
- **Overrides:** When you set a new price here and hit "Save," it creates an "override" in your local browser and cloud storage. The application will ALWAYS prioritize your overrides over the default code.
- **The Reset Button:** "Reset" is NOT a factory reset. It simply acts as an "Undo" button, returning any unsaved numbers in the boxes back to your last official Save Point.

📊 2. Percentage Adjustments (5% & 10%)

- **Independent Adjustments:** You can use the "Apply 5%" or "Apply 10%" buttons to quickly increase prices for a specific package.

- **Rounding Logic:** The system uses a strict "Ceiling Rounding" formula (`Math.ceil``). This guarantees that any calculation producing change (e.g., \$255.50) will instantly jump up to the next whole dollar (e.g., \$256). **No loose change!**
- **Sequential Compounding:** The percentage increases calculate based on whatever price is *currently saved*. If you raise a price and save it, the next time you hit "Apply 10%", it will calculate 10% from the new, higher baseline.

3. Manual Overrides

- **Total Independence:** You are never forced to use percentages. Every box is independent. You can manually type \$99 in Compact, \$500 in Truck, lower a different package to \$50, and leave everything else untouched.
- **Zero Interruption:** Changing one price manually will *never* break or recalculate the other packages unless you explicitly tell the system to do so.

4. Saving and Restoring

- **Saving:** Once you are satisfied with your edits, click "Save" on the individual package, or "Save All" at the top right. This locks the prices in permanently.
- **Restore Pricing from JSON:** If you ever want to revert everything back to a previous state, use the "Backup as JSON" button before you make big changes. You can then use "Restore Pricing from JSON" to instantly load those old prices back into the system.

5. Human-Readable Audit Trail

- **Clear Activity Log:** Rather than tracking vague system codes, manual price history logs translate entries into readable statements showing the exact service package name, vehicle classification, and final price (e.g., `Saved changes: Prime Essential Interior (Compact) to \$185`). You can edit the description of these logs or delete records instantly.

6. Smart Sync Comparison (Clean Git Workspace)

- **Git Cleanliness:** Integrates dynamic comparison logic inside the mock server that blocks redundant file writes to `packagesLive.json`` if sync data matches the active state. This keeps your local development and Git tree 100% clean and pristine unless an actual price change is saved.

7. Automated Class Mappings

- **Vehicle Class Pricing:** The booking engine automatically associates pricing for Compact, Midsize, Truck, and Luxury classifications directly from your saved package rates. You never have to manually map or program size rules.

PART 4 OF 8

CHEMICAL MASTERY, DILUTIONS & INVENTORY CONTROL

Surface Science, Concentrates & Asset Accounting

Precision chemistry diagnosis, the universal dilution ratio formula, secondary container labeling, mobile caddy staging, and physical inventory auditing.

Contains 1 structured operational chapters.

DILUTION REFERENCE CHART

CHAPTER SCOPE & OBJECTIVE:

Quick-access printable reference for chemical ratios.

PRIME MASTER CHEMICAL DILUTION REFERENCE TABLE				
Standard dilution ratios for high-volume detailing chemicals used in shop and mobile operations.				
CHEMICAL / PRODUCT	RATIO	OUNCES PER 32OZ BOTTLE	WATER FILL LINE	TARGET SURFACES & PURPOSE
All-Purpose Cleaner (Heavy)	1:4	6.4 oz	25.6 oz	Wheels, tires, engine bay, heavy grease
All-Purpose Cleaner (Medium)	1:10	2.9 oz	29.1 oz	Door jambs, rubber floor mats, pedals
Interior Cockpit Cleaner	1:16	1.9 oz	30.1 oz	Dashboard, console, vinyl door cards
Leather Cleaner (Gentle)	1:20	1.5 oz	30.5 oz	Coated leather, stitch seams, steering wheels
Glass Cleaner Concentrate	1:10	2.9 oz	29.1 oz	Streak-free tint-safe glass & mirrors
Iron Decon / Fallout Remover	RTU (1:0)	32.0 oz	0.0 oz	Paint decontamination, brake dust release
Clay Lube / Rinseless Wash	1:64	0.5 oz	31.5 oz	Mechanical clay bar lubrication, dry dusting
Ceramic Spray Sealant	RTU (1:0)	32.0 oz	0.0 oz	Gloss enhancement, hydrophobicity layer

- Overview:** A condensed view of all shop dilution ratios.
- **Layout:** Organized by brand and task for rapid identification.
 - **Print:** Designed to be printed and posted in the chemical room.

GLOSSARY OF KEY TERMS

Definitions of proprietary systems, workflows, formulas, and acronyms used throughout the Prime Auto Detail platform.

Caddy Worksheet

OPERATIONS

Standardized organizational matrix defining the 6 core spray bottles, chemical dilutions, and trigger types carried in mobile technician detailing caddies.

Chemical Decision System

CHEMICALS

Multi-phase diagnostic protocol identifying surface substrate, contaminant chemistry (organic, mineral, petroleum, ferrous), and prescribing optimal chemical matches.

Dilution Ratio (1:X)

CHEMICALS

Standard volumetric ratio where 1 part chemical concentrate is blended with X parts water. Total parts in calculation equal $(1 + X)$.

Elite Story Master

MARKETING

Visual showcase management tool sequencing before-and-after vehicle transformation photo galleries for public marketing.

F150 Command Center

FLEET & RIG

Specialized mobile detailing truck configuration interface managing water tank weight distribution, generator capacity, chemical load, and winterization.

Hosted Acceptance Portal

CRM & SALES

Tokenized client-facing web page allowing customers to review, customize add-ons, and digitally sign off on estimates without password authentication.
